109. OBSOLETE CENTRAL OFFICE SERVICES

109.1 DIAL SWITCHING SYSTEMS

109.1.1 CENTREX SERVICE

A. General

1. Description

- a. Centrex Service is a centralized telephone system that provides station-to-station calling, direct inward/outward dialing, station line identification on outward calls, call transfer and intercept of non-working lines.
- b. Station lines in a Centrex system terminate on and are switched through a central office type switching system on Company premises.
- c. The two types of Centrex systems are Centrex I and Centrex II. Features provided with each system are described under B., following.
- d. Attendant positions with Centrex systems are on customer premises.
- e. Centrex Service is offered only as a complete service. The Centrex station line charges consist of exchange access and intercommunication. Exchange access cannot be provided without intercommunication.
- f. Centrex Service is offered only where switching equipment and facilities are available.
- g. Centrex CO principal locations will not be furnished as a new service to any customer or applicant. Secondary locations, station lines, attendant positions and optional service features may be added to present Centrex CO systems so long as the existing switching equipment is capable of providing the additional requested service and the additional required equipment, if any, is available from existing or recovered stock.
- h. Business Centrex telephones may be located on any premises of the same customer or on the premises of other than the customer, however, Centrex telephones located on the premises of other than the customer are to be used only for communications with such other telephones as are connected with the Centrex system and located on the premises of the customer.

Issued: 4-24-06

ORIGINAL

Effective: 5-1-06
Per Decision No. 68604

109. OBSOLETE CENTRAL OFFICE SERVICES

109.1 DIAL SWITCHING SYSTEMS

109.1.1 CENTREX SERVICE

A.1. (Cont'd)

- i. Business Centrex telephones may be used to supplement regular customer's residence service. Business Centrex telephones may also be installed in a residence for the use of the customer, his immediate family, employees or representatives upon the customer's business, where the residential use is only incidental.
- j. Centrex Service contemplates that long distance calls will be identified by station number on the customer's bill.
- k. The type and quantity of equipment and facilities used in providing Centrex Service will be determined by the Company based on regular engineering practices and economic considerations. Where quantities of switching equipment, CO lines or other facilities, other than those considered adequate by the Company, are requested by the customer, additional rates and charges may be applied based on the circumstances in each case.

2. Classes of Service-Centrex Station Lines

Business Service

Those station lines that serve the premises of business customers, college or university administrative buildings, faculty clubs, student unions, or administrative quarters of dormitories. The service is available only on a flat rate basis.

Issued: 4-24-06

ORIGINAL

Effective: 5-1-06

109. OBSOLETE CENTRAL OFFICE SERVICES

109.1 DIAL SWITCHING SYSTEMS

109.1.1 CENTREX SERVICE

A. General (Cont'd)

3. Centrex System Minimum Monthly Charge

Centrex Service is subject to a minimum monthly billing of 100 main station lines at the principal location. There is no minimum monthly rate applicable at secondary locations.

4. Station Line Charge Application

- a. The Centrex main-station line consists of all facilities, including the station line number, intercommunication and outside plant facilities, from the Centrex switching equipment to the interface arrangement on the customer's premises allowing connection to inside wiring.
- b. The rate and charge for a Centrex main or extension station line is applicable to each jack termination or outlet of a main or extension station location, respective, to which an instrument can be connected.

5. Telephones

- a. Rates and charges for Centrex station lines do not include provision of inside wire nor jacks.

109.1.1 CENTREX SERVICE

A. General (Cont'd)

6. Application of Mileage and Incremental Charges

- a. The method of serving main station lines located on continuous or noncontinuous property will be determined by the Company. The application of mileage or incremental charges is the same whether the telephone lines are served by individual cable pairs or through concentrator equipment.
- b. The basic station line rate schedule specified for telephone lines at the principal location is applicable where the principal Centrex location is within the base rate area.
- c. The basic station line rate schedule specified for telephone lines at each secondary location is applicable where the principal and secondary locations are within the base rate area and the same Centrex rate area.
- d. In the administration of Centrex station line rates in single CO district exchanges, the Centrex rate area is coextensive with the exchange area. In multi-CO district exchanges, the Centrex rate areas are defined by Centrex rate area maps.
- e. Where the principal Centrex location is in an exchange zone rate area, the exchange zone PBX trunk increment charge (ZNA), as appropriate, will apply to each circuit serving the principal Centrex location. The number of such circuits is determined on an engineered basis at the time the service is established and will remain unchanged until the engineered capacity of the Centrex system is changed at which time the incremental charges will be recomputed. The regular exchange service extension mileage charge treatment only will apply to station lines at the principal location outside the primary building. Basic Centrex station line rates and the application of mileage or incremental charges is the same as that specified herein for each secondary location.

A.6. (Cont'd)

- f. In connection with foreign exchange main station line service, the basic secondary location Centrex station line rate schedule will apply at each FX station location. Except as specified for contiguous exchanges below, the Centrex station line will be treated as an individual line business service for the application of FX terms, conditions, rates and charges.

Noncontiguous Exchanges

In multi-office exchanges where the principal Centrex location is in a CO district other than the principal CO district of the serving exchange, FCO mileage charges, as specified in the Competitive Private Line Transport Services Price Cap Tariff, will apply to the circuit between the principal CO and the CO serving the Centrex system.

A. General (Cont'd)

7. Directory Listings

- a. The Company furnishes one directory listing per Centrex system without charge. A sublisting stating that station lines can be dialed direct if the number is known, is also furnished without charge.
- b. Further directory listings are offered at rates specified in 5.7.1, preceding.
- c. When a suburban directory also is furnished for the area containing the principal location of the Centrex System or in which the main station line is terminated, the listing may be furnished in that directory also without additional charge (FLT).

8. Intercept of Calls to Unassigned Main Station Line Numbers

- a. Local and Message Telecommunication Service (MTS) calls to unassigned numbers are intercepted by a standard CO recorded announcement. The common message is that the number is not in service. Referral to an attendant or the directory is not provided.
- b. Intercommunicating calls to unassigned numbers are intercepted by a standard CO announcement for Centrex Service. The common message is that the number is not in service and that the caller needs to consult the attendant or the directory.

9. Contract Period and Termination Charges

The initial contract period for the system is three years at the same location. The termination charge is an amount equal to the minimum monthly rate for the unexpired portion of the initial contract period.

109.1 DIAL SWITCHING SYSTEMS

109.1.1 CENTREX SERVICE (Cont'd)

B. Basic Features

1. Centrex I Service consists of these basic features:

- Call Transfer-Attendant
- Direct Inward Dialing (DID)
- Direct Outward Dialing (DOD)
- Identified Outward Dialing (IOD)
- Fixed Night Service
- Outgoing Call Restriction
- Station-to-Station Calling
- Station Line Hunting
- Power Failure

2. Centrex II Service consists of all of the above basic features plus:

- Add-On Conference
- Consultation Hold
- Station Dial Transfer
- Trunk Answer-Any Station Line

C. Optional Features

1. These Centrex optional features are offered only:

- a. Where the serving CO is equipped with suitable facilities, and
- b. Where the CO is programmed for the features following.

- Automatic Route Selection (ARS)
- Call Forwarding - Busy Line
- Call Forwarding - Don't Answer
- Call Hold, Call Pick-up, Call Forwarding-Variable
- Call Transfer-Individual-All Calls, Consultation Hold-All Calls, Three-Way Calling
- Camp-On and Indication of Camp-On
- Common Code Access Arrangement
- Recorded Intercept Service
- SMDR
- Speed Calling
- Dedicated Private Line Terminations

109. OBSOLETE CENTRAL OFFICE SERVICES

109.1 DIAL SWITCHING SYSTEMS

109.1.1 CENTREX SERVICE (Cont'd)

D. Definitions

Add-On Conference

Permits a station line user to establish a 3-way conference by adding a third party station line to an in-progress call.

Attendant Camp-On

Allows a call the attendant tries to complete to a busy line to be held waiting, then connected when the called line is free. The call may be an incoming local or toll call. Station lines equipped with Call Waiting cannot be camped-on. A tone is provided to the busy station line to indicate that a call is waiting. This feature is available on properly equipped consoles.

Attendant Call Transfer

Permits the transfer of incoming DID calls from one station line to another by the attendant.

Busy Verification by Attendant

Establishes a connection to an apparently busy trunk or line to determine if either is working. Periodic bursts of tone alert the talking parties to the attendant's presence.

Call Transfer-All Calls

Permits a station line user to transfer any established call to another station line within the same system without the aid of the attendant.

Call Hold

Permits a station line user to hold any call in progress by dialing a code. While the first call is held, another call may be placed over the same station line. A call placed in Call Hold cannot then be included with Add-On or Three-Way call.

109. OBSOLETE CENTRAL OFFICE SERVICES

109.1 DIAL SWITCHING SYSTEMS

109.1.1 CENTREX SERVICE

D. Definitions (Cont'd)

Centrex Service

- The designation, Centrex CO, indicates the dial switching equipment is located in space provided by the Company and the attendant position equipment is located on the customer's premises.
- A principal location is any one continuous property location mutually agreed upon by the customer and the Company. The location will normally be where one or more attendant positions are installed.
- Secondary locations are different premises of a Centrex customer served by one or more stations of the same Centrex system.
- A primary building is that building in which the attendant positions are installed or any other building mutually agreed upon by the customer and the Company. A primary building shall be so designated at the principal location as well as each secondary location for the purpose of applying extension line mileage charges.

Extension Stations

An additional station line(s) on a main Centrex station line.

Indication of Camp-On

Provides a distinctive tone to the busy called station line when there is a camped-on CO call waiting.

109. OBSOLETE CENTRAL OFFICE SERVICES

109.1 DIAL SWITCHING SYSTEMS

109.1.1 CENTREX SERVICE

D. Definitions (Cont'd)

Main Station Line

The termination of a Centrex station line to which a number is assigned to the interface on the customer's premises allowing connection to inside wiring.

Restriction From Outgoing Calls

This service feature denies selected stations within the Centrex system the ability to place outside calls and/or certain miscellaneous trunk calls without the assistance of the attendant.

Trunk Answer-Any Station Line

Allows incoming MTS calls to be answered at any unrestricted station line by dialing a special trunk answer code.

Unattended Centrex System

A Centrex system which does not have an attendant position.

a. Separate Centrex Systems

Separate Centrex systems may be connected by voice grade circuits from the Competitive Private Line Transport Services Price Cap Tariff. The appropriate terms, conditions, rates and charges will apply to each separate Centrex system. All inward calls from the exchange and message toll network forwarded to a connected system must be completed manually by the Centrex attendant to the distant Centrex system. Regular rates and charges will apply to all voice grade circuits and voice grade circuit terminal equipment used to connect the systems.

b. Other Systems

Centrex systems may be connected to separate PBX systems by voice grade circuits. All inward calls from the exchange and message toll network forwarded to a connected system must be completed manually by the attendant to the distant PBX. Regular rates and charges will apply to all voice grade circuits and voice grade circuit terminal equipment used to connect the systems.

6. Supplemental Answering Positions

Supplemental answering positions are available in connection with Centrex Service for the sole purpose of providing centralized answering service to a group of Centrex station lines. The circuits to provide this connection are combination voice grade circuits.

	USOC	NONRECURRING CHARGE MAXIMUM	CURRENT
• Combination voice grade circuit, each[1]	2A5	\$145.20	\$72.60
	USOC	MAXIMUM MONTHLY RATE	CURRENT MONTHLY RATE
• Combination voice grade circuit, each[1]	2A5	\$227.55	\$75.85

[1] Regular exchange service extension mileage charges as specified in the Competitive Private Line Transport Services Price Cap Tariff will apply to each combination voice grade circuit.

7. Single Building Centrex II A CO Service

- a. Centrex II A CO Service is a special common Centrex Service arrangement designed for the individual use or the tenants or occupants of a single building.
- b. Centrex II A CO Service permits completion of inward and outward local and long distance calls directly from the Centrex telephone. Attendant position equipment is not furnished. Where centralized answering of calls is desired, Multiline Telephone System telephones may be provided on an individual customer basis.
- c. The special switching equipment required for this service is installed only in Company COs. COs will be equipped at the discretion of the Company.
- d. This service will not be provided where the combined requirements of all customers is less than 100 Centrex II A CO main station lines in the same building.
- e. Each customer will be provided one directory listing without charge. Other listings of individual Centrex II A CO lines will be provided at regular business additional listing rates.
- f. Centrex II A CO Service is available only on a flat rate basis and as a complete service. The exchange access or intercommunication portions of the Centrex II A CO Service main station line rates are not offered separately.
- g. The initial contract period is the same as that for individual line business service and is applied separately to each customer.
- h. Centrex II A CO Service contemplates that long distance calls will be identified by station number on the customer's bill.
- i. Centrex II A CO Service is available only to existing or new tenant customers located in buildings where such service is furnished as of December 31, 1975.
- j. The basic station line rate schedule applies separately to each individual customer. The total rate per main station line is the sum of the appropriate exchange access and intercommunication rate.

F. Attendant Positions

1. Description

Primary Attendant Position

The switchboard or console which provides the primary attendant functions for a Centrex system. When this position is in use any alternate positions will be rendered inoperative.

Additional Attendant Position

A switchboard or console which has the same basic functions as the primary position and is used in addition to and at the same time as the primary position.

Alternate Attendant Position

A switchboard or console which has the same basic functions as the primary position but is used only when the primary position is not in use. This attendant position will be rendered inoperative by the primary position.

Auxiliary Attendant Position

A console or multiline telephone set which does not have the full functional capabilities of the primary position and is used for auxiliary service when the primary, additional or alternate positions are not in use.

Console

A push-button operated desk or table top attendant position unit in which connections are made by means of push buttons and/or a telephone dial.

F. Attendant Positions (Cont'd)

2. Rates and Charges

- a. The attendant position is provided for Centrex I and II CO, Special School Centrex and Airport Intercommunicating Service in which all switching equipment is located on Company premises.

Where, in the opinion of the Company, the type of lines terminated and the operating practices of the customer permit unattended operation, Centrex II Systems may be installed without an attendant position.

	USOC	NONRECURRING CHARGE MAXIMUM	CURRENT
• Attendant position, each	RXX	\$608.00	\$304.00

	USOC	MAXIMUM MONTHLY RATE	CURRENT MONTHLY RATE
• Attendant position, each	RXX	\$629.73	\$209.91

b. Connection of Centrex Systems to Other Systems

When CO trunks terminate in an attendant position, the attendant position and the associated dial switching equipment where provided will be considered a separate PBX system.

3. Moves and Changes

- a. The attendant position charge as specified will not apply to those instances where an attendant push-button console is moved and no cable reterminations, additional cable, or any other apparatus is required. A separate charge specified following will apply in those instances.[1]

[1] The nonrecurring charge is per attendant position.

109.1.2 ELECTRONIC SWITCHING SYSTEM (ESS) SERVICE

A. Electronic Switching System Exchange (ESSX-1) Service

1. Description

- a. ESSX-1 Service is a business communications service furnished only from a No. 1 or No. 1A Electronic Switching System (ESS) CO and is offered subject to the availability of facilities and applicable generic feature programs. The provision of such facilities and programs will be determined by the Company based upon regular engineering practices and economic considerations.
- b. ESSX-1 Service is so arranged as to provide the following basic service features:
 - Direct inward and outward dialing of exchange and long distance message network calls from telephones and attendant positions.
 - Intercommunication between telephones of the same ESSX-1 system.
 - Identification, by main station line number on the customer's bill, of outgoing and incoming collect long distance message network calls.
 - Call transfer-all calls provides for transfer, consultation hold and add-on for any established call without the assistance of an attendant.
 - Main station line hunting.
 - Common recorded announcement for interception of calls to unassigned telephone numbers.
 - Touch-tone calling provided on station lines and attendant positions.
 - Trunk answer any telephone for incoming primary listed directory calls.
- c. ESSX-1 Service provides one of the following three standard main station line classes of service:
 - Fully restricted station line. A station user may only originate or receive intercommunication type calls. A station user cannot call the attendant nor use the call transfer feature.
 - Semi-Restricted station line. A station user may originate or receive intercommunication, voice grade circuit and/or FX types of calls. A station user may call the attendant.
 - Non-Restricted station line. A station user may originate or receive any type of call.

109.1.6 AIRPORT INTERCOMMUNICATING SERVICE

A. Description

Airport Intercommunicating Service is a special telephone service arrangement designed for the common use of airline companies and others located at airports who serve the air traveling public. The service is provided by common dial switching equipment, station lines, stations and attendant position equipment, as required. The arrangement contemplates inward and outward local and long distance calling without operator assistance. The service is available only on a flat rate basis.

B. Terms and Conditions

1. The service will be furnished at the rates and charges specified herein for customers located in the air terminal building and to others located within the airport service rate area who are engaged in providing service and facilities to the air traveling public. Customers qualifying for this service will be determined by the Company and shall exclude customers such as hotels, motels, banks, manufacturers, etc., who normally conduct their business at other locations. Regular exchange service may be provided within the airport service rate area as required.
2. The airport service rate area shall include the land and buildings, surrounding the air terminal building, used in the operation of the airport. This land may be intersected by streets and/or alleys. The airport service rate area shall be defined by an airport service rate area map showing the boundaries of the area to be served under the rates, terms and conditions specified herein.
3. The CO switching equipment is provided in the type and quantity as determined by the Company.
4. Directory listings of Airport Intercommunicating Service customers will be provided in the regular telephone directory of the service exchange, subject to the terms, conditions, rates, and charges specified in Section 5, preceding. An Airport Intercommunicating Service directory will also be published by the Company. Listings in this directory will be provided, without the charge, in the type, quantity, and arrangement necessary, in the opinion of the Company, to adequately identify the customer's service. Regular rates, terms and conditions will apply to other listings.

109.1 DIAL SWITCHING SYSTEMS

109.1.6 AIRPORT INTERCOMMUNICATING SERVICE

B. Terms and Conditions (Cont'd)

5. Long distance calls will be identified by telephone number on the customer's bill.
6. The service will be provided with or without an attendant position at the option of the individual Airport Intercommunicating Service customer.
7. Toll diverting service is not offered in connection with this service.
8. The rates and charges specified below are applicable at airports having requirements for 100 or more main station lines within the airport service rate area. The service will not be provided at locations where less than 100 main station lines are required.
9. The basic station line rate schedule starts over again for each individual customer to Airport Intercommunicating Service.
10. The station line rates specified herein are subject to the following terms, conditions, mileage, and incremental charges as appropriate:
 - Exchange service extension mileage charges will not apply to stations (main or extension) located within the airport service rate area. Regular exchange service extension mileage charge treatment will apply to all extension station lines located outside of the airport service rate area.
 - The basic station line rate schedule starts over again at each location outside of the airport service rate area (RX3).

109. OBSOLETE CENTRAL OFFICE SERVICES

109.1 DIAL SWITCHING SYSTEMS

109.1.6 AIRPORT INTERCOMMUNICATING SERVICE

B.10. (Cont'd)

- In addition to the basic station line rates, the regular exchange zone rate area individual line business service increment, (ZNA), will apply to main stations located outside of the airport service rate area in exchange zone rate areas.
- The incremental station line rate treatment specified for Centrex main station line service will apply where the airport service rate area and the main station are located in different CO districts of the same exchange (RGR;RGU).
- In connection with FX main station service the basic main station line rate schedule will apply to main stations at each FX station location. Each circuit required to serve the main stations at FX locations from the serving exchange will be treated as an individual line business service for the application of FX mileage. In multi-office exchanges where the airport service rate area is in a CO district other than the principal CO district of the serving exchange, FCO mileage charges will apply to the circuit between the principal CO and the CO serving the airport service rate area.
- Where the airport service rate area is located in an exchange zone rate area, the exchange zone rate area individual line business service increment (ZNA) as appropriate, will apply to each main station served on a direct individual line basis in addition to the basic station rate schedule. In such cases, where the stations are associated with an attendant position, the incremental charges (ZNA) will apply to each circuit serving the attendant position and the basic station line rate schedule will apply to the stations located within the airport service rate area. The number of circuits serving the attendant position is determined on an engineered basis at the time the service is established and will remain unchanged until the engineered capacity of the position is changed at which time the incremental charge will be recomputed.

109. OBSOLETE CENTRAL OFFICE SERVICES

109.1 DIAL SWITCHING SYSTEMS

109.1.6 AIRPORT INTERCOMMUNICATING SERVICE

B. Terms and Conditions (Cont'd)

11. Incoming and/or outgoing lines terminated in ACD equipment associated with Airport Intercommunicating Service will be treated as regular flat 2-way CO trunks for the application of terms, conditions, rates and charges.
12. Station lines associated with existing services, located within the airport service rate area, will be given appropriate number assignments and be connected to the Airport Intercommunicating Service system without charge.
13. Airport Intercommunicating Service is offered only as a complete service. The exchange access and intercommunication portions of the Airport Intercommunicating Service main station line rates are not offered separately.
14. Airport Intercommunicating Service will not be furnished as a new service to any customer or applicant. The station lines, attendant positions and optional service features may be added to present systems so long as the existing switching equipment is capable of providing the additional requested service and the additional required equipment, if any, is available from existing or recovered stock.
15. Station Lines

The rate and charge for a main or extension station line is applicable to each telephone jack termination or outlet of a main or extension station location, respectively, to which an instrument can be connected.

109.1.6 AIRPORT INTERCOMMUNICATING SERVICE

B. Terms and Conditions (Cont'd)

16. Rate Stability Plan (RSP)

- a. The Rate Stability Plan (RSP) is an optional arrangement whereby customers who agree to continue to subscribe to certain services for a designated period of time are guaranteed against Company initiated changes in the monthly rates for that service during the designated period. The Rate Stability Plan is furnished subject to the following regulations and rates, in addition to the Termination Liability/Waiver Policy as set forth in 2.2.14.D. of the Exchange and Network Services Price Cap Tariff.
- b. A customer selecting this plan assumes the obligation to pay a minimum of 24 monthly payments, effective on date of customer's first RSP bill.
- c. This Rate Stability Plan guarantees stabilized rates through December 31, 1990, at which time the stabilized rates are subject to change.
- d. The RSP customer assumes the obligation for a minimum of 90% of the Intercom portion of Airport Station Lines that are subscribed to at the time the customer's RSP becomes effective.
- e. Lines added in excess of 110% of the original number of lines the customer protected by the RSP will be billed at the regular month-to-month rate.
- f. Customers with Airport Intercommunicating Service in which the switching equipment is located on Company premises, may subscribe to the Rate Stability Plan. This plan will guarantee against Company initiated rate changes in the main station lines - intercommunication portion only.
- g. Additions of lines subject to the availability of facilities are permitted at the stabilized rate without penalty.
- h. Line rearrangements, reassociations, or moves are provided without incurring termination charges.
- i. All new lines installed under the Rate Stability Plan are subject to the applicable nonrecurring charge.
- j. Any reductions in the lines furnished under the Rate Stability Plan below the 90% commitment will not reduce the RSP payments for the duration of the term, unless termination charges are applied.

B.16. (Cont'd)

- k. Termination charges may apply if the Rate Stability Plan contract is terminated in whole or in part by the customer or is terminated for cause by the Company prior to expiration of the agreed-payment period. The Termination Liability/Waiver Policy is specified in 2.2.14.D. of the Exchange and Network Services Price Cap Tariff.
- l. With the written permission of the Company, the obligation to pay the Rate Stability Plan charges for the remainder of the plan may be assigned to another subscriber at the same location for a transfer fee. This transfer charge is payable by the incoming customer. In addition to assuming the responsibility to pay the rate for the remainder of the period, the new subscriber assumes the conditions applicable to the offering.

	CHARGE	
	MAXIMUM	CURRENT

- | | | |
|-------------------|----------|----------|
| • Transfer Charge | \$300.00 | \$150.00 |
|-------------------|----------|----------|
- m. Any subscriber to the Rate Stability Plan wishing to continue service beyond the end of the RSP period may elect:
 - Current month-to-month tariff rates.
 - If offered, a renewal of the Rate Stability Plan. The Company makes no assurance that such a plan will be offered beyond December 31, 1990, or that such an offering would be at the same rates as set forth in this Tariff.
 - n. Rate stability for all service and facilities provided under the RSP terminates simultaneously at the earliest applicable RSP date.

C. Rates and Charges

1. The basic station line rates specified below include the common dial switching equipment, power plant, necessary CO trunks and station dial transfer feature.
2. The total rate, per main station line, is the sum of the appropriate exchange access and intercommunication rate.

AIRPORT INTERCOMMUNICATING STATION LINES (CO)	USOC	NONRECURRING CHARGE	
		MAXIMUM	CURRENT
• First 5 main station lines, each			
- Exchange access	RXR	\$95.00	\$47.50
- Intercommunication and station line	NRX	23.00	11.50
• Next 45 main station lines, each			
- Exchange access	RXR	95.00	47.50
- Intercommunication and station line	NRX	23.00	11.50
• Next 250 main station lines, each			
- Exchange access	RXR	95.00	47.50
- Intercommunication and station line	NRX	23.00	11.50
• Additional main station lines, each			
- Exchange access	RXR	95.00	47.50

109.1.7 CUSTOMIZED CALL MANAGEMENT SERVICES/CENTRON I SERVICE

A. Description

Customized Call Management Services (CCMS)/CENTRON I Service Optional Features are forwarded from a Stored Program Controlled central office. CCMS is the offering available to business customers; CENTRON I is the offering available to residence customers. The following CCMS/CENTRON I Service Optional Features are grandfathered and available only to existing customers.

B. Optional Features

Alternate Answering - (Call Forwarding-Busy Line/Don't Answer)[1]

This feature automatically transfers incoming calls that encounter a (1) busy condition and/or a (2) don't answer condition after a preselected number of rings (from 1 to 7) to an alternate designated line.

Alternate Answering - (Call Forwarding-Busy Line)(Residence Only)[1]

This feature automatically transfers incoming calls that encounter a busy condition to an alternate designated line.

Alternate Answering - (Call Forwarding-Don't Answer)(Residence Only)[1]

This feature automatically transfers incoming calls that encounter a don't answer condition after a preselected number of rings (from 1 to 7) to an alternate designated line.

Intercom

A user of the CCMS/CENTRON I Service can dial up to 6 or 30 other lines in the same package by dialing an access code followed by 1 or 2 digits. Two user stations with the same line number cannot access each other utilizing the Intercom feature.

[1] When it is determined that a subscriber to Alternate Answering is forwarding calls to a residence line from a business line to the extent that the primary use of the residence line is substantially of a business nature, the residence line will be reclassified as business service and business rates will apply.

109.1.10 OPTIONAL FEATURES

A. General

The optional features and services as specified herein will be provided where feasible in the opinion of the Company and subject to the operating limitations of each specific type of system involved.

B. Automatic Route Selection (ARS)

1. Description

- a. ARS is a Centrex-CO optional feature, available where facilities permit that allows station users, by dialing a preselected code, to automatically select the preferred route subscribed for by a customer, for network calls. Alternate routing to other facilities, subscribed for by the customer, is also provided. This arrangement is available for use with FX, WATS and MTS Network.
- b. ARS is accessed by dialing a single code (1, 2, or 3 digits) which automatically selects the appropriate route (FX, WATS or the MTS Network) to complete the call. If all facilities in the initial route selected are busy, the call will advance to other routes in the selected pattern. Patterns may consist of up to four private routes. If no route is available, the call will route to the MTS Network or overflow tone at the customer's option. All patterns accessed by a single access code will have the same final route, either the MTS Network or overflow tone.
- c. For calls using FX or WATS facilities, the routing may be based on a number plan area (NPA) and limited to specified CO codes within the NPA as designated by the customer. This is referred to as foreign area discrete translation.

2. Terms and Conditions

- a. ARS is offered only to Centrex-CO customers served from ESS central offices equipped to furnish this feature, where facilities permit.
- b. All rates and charges specified for ARS are in addition to the rates and charges for the associated facilities.
- c. Preferred routes and alternate routing patterns will be specified by the customer.

109. OBSOLETE CENTRAL OFFICE SERVICES

109.1 DIAL SWITCHING SYSTEMS

109.1.10 OPTIONAL FEATURES

B. Automatic Route Selection (ARS) (Cont'd)

- d. The number of patterns required by a customer is governed by the type and variety of facilities to which the customer subscribes.
- e. A single rate per facility will apply regardless of the number of patterns having access to that facility. The monthly rate specified is applicable to each facility available to the patterns.
- f. A group of patterns may have either the MTS Network as a final route or overflow tone. A combination of both within the same pattern group, that is, a group of patterns accessed by one code, is not permitted. Dial 9 may be used as an access code only if the patterns accessed have the MTS Network as a final route.
- g. Patterns without final route to the MTS Network may be offered only if a customer subscribed to a sufficient number of facilities which, in the judgment of the Company, provide an adequate level of service so as to avoid interfering with the service of others or to prevent others from making or receiving calls over their telephone service.
- h. Where toll restricted stations have access to ARS patterns with final route to the MTS Network, rates and charges as specified for patterns with overflow to tone apply in lieu of the charges specified for final route to the MTS Network.
- i. Where a route is used on one pattern (pattern reached by one access code) only one translation may be provided per route. Where a route is used in two or more patterns (each pattern is accessed by different access codes) one translation per pattern may be provided subject to the appropriate charges as specified herein.
- j. Voice grade circuits or voice grade circuit groups will not be included as routes in patterns.
- k. The customer is responsible for notifying the Company whenever any additions or changes of routes, patterns or facilities are required.

109. OBSOLETE CENTRAL OFFICE SERVICES

109.1 DIAL SWITCHING SYSTEMS

109.1.10 OPTIONAL FEATURES

B. Automatic Route Selection (ARS) (Cont'd)

3. Definitions

Facility

A facility denotes a specific FX or WATS circuit.

Route

A route is a group of one or more facilities of the same type used to complete 7 or 10 digit calls between the same points, (e.g., 1 FX or 3 WATS Band 1 lines, or 2 WATS Band 5 lines, etc. A WATS Band 1 and a WATS Band 5 are considered to be two routes. Exception: Where a customer has WATS Route Advance, the route capacity of a pattern is only reduced by one route).

Route Selection

The automatic selection of the preferred route as predetermined by the customer, upon dialing of an access code by the Centrex station user.

Pattern

A group of routes arranged to be selected in a sequence specified by the customer.

Foreign Area Discrete Translation

Provides the screening of a specific group of digits, by the Centrex switcher, to determine proper call routing. Where the calls are limited to specific CO designations within the NPA, the NPA code and the CO code (the first 6 digits) must be screened. This is referred to as 6 digit translation.

C. Station Message Detail Recording (SMDR)

1. Description

SMDR is an arrangement to provide a record, by station number, of originating intercity traffic routing over FX, WATS or the MTS Network for Centrex-CO customers served from a No. 1 ESS CO where facilities are available. The station message detail will include the calling station number, the called number, data, time-of-day, duration of call, and the type of facility used. The record will be provided on magnetic tape to customers requiring message detail for cost allocation and telecommunications system management purposes. The detail will be provided on all facilities in the routes selected by the customer for SMDR.

2. Terms and Conditions

- a. SMDR may be offered to telephones of Centrex-CO customers serviced from a No. 1 ESS Co where facilities permit and where the Company's message billing process has been arranged to provide this optional feature.
- b. SMDR is not represented to be a provision of billing detail. Where FX facilities are involved, all such call attempts, whether completed or not, will appear in the SMDR.
- c. Station message details may be provided on all facilities subscribed for by the customer, including the MTS Network, but will not include intercom or tie line calls originated by Centrex station users. The customer may designate the group or groups of facilities on which SMDR is to be provided.
- d. Station message details will be provided on magnetic tape. The tape density and number of tracks will be that used by the program and data processing system in use by the accounting center furnishing the tape.

109.1.12 CENTRON 6 AND 30 SERVICE

Effective July 15, 1991, CENTRON 6 and 30 Service is obsolete for residence and business customers. Existing CENTRON 6 and 30 Service residence and business customers may continue their services on the same premises for the same customer. New installations, changes or moves will be converted to Customized Call Management Services/CENTRON I Service. Service and equipment and nonrecurring charges will be waived for conversions of existing services.

A. Description

1. CENTRON 6 and 30 Service are optional features furnished from a Stored Program Controlled Central Office available to individual line business and residence customers wishing to combine two to thirty exchange access lines into a group. CENTRON 6 and 30 Service require special central office equipment and are not provided in all central offices. The Company may furnish CENTRON 6 and 30 Service where there is available central office equipment with the proper program updates, as determined by the Company.
2. CENTRON 6 and 30 Service cannot be used with remote switching systems (RSS), Centrex services, or other CENTRON services. In addition, CENTRON 6 and 30 Service cannot be used on trunks, or with Public Communications Service, multiparty service, InterLATA Foreign Exchange (FX) service, or Outward WATS.
3. Level access on a CENTRON 6 or 30 Service is not allowed.
4. A customer may choose to combine access lines terminating at different locations into a single CENTRON 6 or 30 package. All access lines terminating in CENTRON 6 or 30 Service, however, must be served by the same central office.
5. The quality of transmission for calls utilizing CENTRON 6 or 30 Call Forwarding or CENTRON 6 or 30 Conferencing may vary depending on the distance and routing involved. The Company makes no representation as to the quality of the transmission on such calls.

109.1.12 CENTRON 6 AND 30 SERVICE

A. Description (Cont'd)

6. *CENTRON* 6 and 30 Service standard and optional features cannot be used in combination with existing Custom Calling services.
7. *CENTRON* 6 or 30 Service are allowed only with touch-tone equipped access lines.
8. Suspension of service will not be allowed for *CENTRON* 6 or 30 Service.
9. *CENTRON* 6 and 30 Service will not be provided as a new service to any customer or applicant with a single individual line as of March 22, 1984. These services presently being furnished on a one-line basis to existing customer may be continued in service on the same premises for the same customer. Additional features may be added to the present system so long as the central office facilities are available.
10. When *CENTRON* 6 or 30 is provided on lines arranged for Hunting Service, all lines in the hunt group must be equipped for *CENTRON* 6 or 30 Service.
11. The minimum service period for *CENTRON* 6 or 30 Service is one month.
12. In a multiple user environment each individual customer is responsible for all applicable rates and charges associated with their individual access line service. In addition, each individual customer will be responsible for all applicable *CENTRON* 6 or 30 Service per line rates and charges. A primary customer, to be designated by the multiple users, will be responsible for all applicable system, group and/or list rates and charges.
13. 800 Service circuit terminating on a *CENTRON* 6 or 30 Service can be furnished with *CENTRON* 6 or 30 standard and optional features excluding the intercom feature.

109. OBSOLETE CENTRAL OFFICE SERVICES

109.1 DIAL SWITCHING SYSTEMS

109.1.12 CENTRON 6 AND 30 SERVICE (Cont'd)

B. Standard Features

6 Intercom

A user of the CENTRON 6 Service can dial up to five other lines in the same package by dialing an access code followed by a single digit. Two user stations with the same line number cannot access each other utilizing the Intercom feature.

30 Intercom

A user of the CENTRON 30 Service can dial up to 29 other lines in the same package by dialing an access code followed by two digits. Two user stations with the same line number cannot access each other utilizing the Intercom feature.

Touch-Tone

Touch-Tone Calling Service is a distinctive type of telephone service using audible voice frequency tones to actuate the CO equipment, and is provided as a part of the standard package. Regular touch-tone charges do not apply.

Call Hold

A user of CENTRON 6 or 30 Service can place any established call on hold by dialing a control code. This frees the line to originate another call or use the call pickup feature.

Call Pickup Group

This feature enables a user of CENTRON 6 or 30 Service to answer a call which has been directed to another line in the package. Additional Call Pickup Groups are available as an optional feature.

C. Optional Features

Additional Pick-Up Group

This feature enables a user of CENTRON 6 or 30 Service to answer a call which has been directed to another line in the package. These Call Pick-up Groups are in addition to the Call Pick-up Group provided as standard feature.

Call Waiting

This feature provides a tone alert to a CENTRON 6 or 30 Service user who is on an existing call that another call is waiting.

Call Forwarding

This feature allows the user to program automatic transfer of all calls made to the called line to a different line, within or outside the CENTRON 6 or 30 group.

Alternate Answering - (Call Forwarding, Busy/Don't Answer)[1]

This feature automatically transfers incoming calls that encounter a busy condition and/or a don't answer condition after a preselected number of rings (from 1 to 7) to an alternate designated line within the package.

Alternate Answering - (Busy Line)[1]

This feature automatically transfers incoming calls that encounter a busy condition to an alternate designated line within the package.

Alternate Answering - (Don't Answer)[1]

This feature automatically transfers incoming calls that encounter a don't answer condition after a preselected number of rings (from 1 to 7) to an alternate designated line within the package.

[1] When it is determined that a subscriber to Alternate Answering is forwarding calls to a residence line from a business line to the extent that the primary use of the residence line is substantially of a business nature, the residence line will be reclassified as business service and business rates will apply.

109.1.13 CENTRON CUSTOM SERVICE

Effective September 1, 2004, *CENTRON* Custom Service is grandfathered to current customers. Customers currently on month-to-month arrangements will need to migrate to another Qwest service by December 1, 2004. Customers whose contract term expires on or after September 1, 2004, but before June 30, 2006, will be allowed to extend their contract, as long as they do not extend beyond June 30, 2006. All existing contracts whose term expires after June 30, 2006 will be honored, however, no contract extensions will be permitted.

A. Description

1. *CENTRON* Custom is a business communications system furnished only from a Stored Program Controlled central office and is offered subject to the availability of facilities and applicable generic feature programs. Network access is provided through Network Access Registers. The provision of such facilities and programs will be determined by the Company based upon regular engineering practices and economic considerations.

CENTRON Custom is so arranged as to provide the following basic service features:

- a. Direct inward and outward dialing of exchange and long distance message network calls from stations and attendant positions.
- b. Intercommunication between station lines of the same *CENTRON* Custom system.
- c. Identification, by main station line number on the customer's bill, of outgoing and incoming collect long distance message network calls.
- d. Call transfer-all calls, provides for all transfers including *DID* to *DOD*, consultation hold and add-on for any established call without the assistance of an attendant.
- e. Main station line series completion and multiline hunting.[1]
- f. Common recorded announcement for interception of calls to unassigned station numbers.
- g. Touch-Tone calling provided on station lines.
- h. Trunk answer any station for incoming primary listed directory calls.

[1] Hunting requirements differ by type of office.

109.1 DIAL SWITCHING SYSTEMS

109.1.13 CENTRON CUSTOM SERVICE

A. Description (Cont'd)

2. Miscellaneous lines are those lines which are not a basic part of the *CENTRON* Custom system, i.e., Voice Grade Circuits, WATS, etc., but which require *CENTRON* Custom switching capabilities in order to function with *CENTRON* Custom service. Each miscellaneous line that is terminated in a *CENTRON* Custom system requires a termination arrangement.
3. Main station line features may be provided for attendant access lines where facilities permit.
4. Group Use Service provides intercommunication capability for different customers to dial one another by way of a four or five digit number provided the different customers are served from the same serving central office.
5. Features
 - a. Standard *CENTRON* Custom features allowed on main station lines:
 - Restrictions (line Class of Service)
 - Semi Restricted
 - Non Restricted
 - Toll Restriction
 - Hunting
 - Series Sequential
 - Series Non Sequential
 - Multiline
 - Flexible Station Hunting (2B ESS)

109. OBSOLETE CENTRAL OFFICE SERVICES

109.1 DIAL SWITCHING SYSTEMS

109.1.13 CENTRON CUSTOM SERVICE

A. Description (Cont'd)

7. All classes of service with the exception of Deny Origination, are allowed access to Voice Grade Circuits and WATS, etc., providing the station is translated with the proper category codes.
8. New line class code screening may be negotiated, providing the office is capable of the arrangement requested.
9. Split service common equipment is required when a *CENTRON* Custom customer desires to segregate the *CENTRON* Custom station lines into separate groups, thereby enabling each group to have a different set of system common features.
10. The network demarcation for *CENTRON* Custom is the point at which the entrance facilities to the building, office park or buildings within a campus environment are initially terminated. *CENTRON*-Custom service and features are provided up to the network demarcation at rates and charges specified herein. The customer will be responsible for provision of all wire and/or cable facilities on the customer's side of the network demarcation. Any such facilities installed by the Company will be provided on a time and materials basis.

B. Terms and Conditions

1. All *CENTRON* Custom station lines must be associated with the main switching equipment. Satellite switching equipment is not offered with *CENTRON* Custom. Other switching systems connected to a *CENTRON* Custom system by Voice Grade Circuits or group use arrangements are considered as separate systems and are billed as such.
2. Temporary suspension, either full or partial, of *CENTRON* Custom is not permitted.

B. Terms and Conditions (Cont'd)

3. Where an ESS served Centrex-CO customer elects to convert to *CENTRON* Custom, nonrecurring charges do not apply to in-service station lines, terminating arrangements, and optional service features provided that (1) the customer's system continues to be served by the same switching equipment, (2) there is no interruption of service, and (3) there are no moves, changes or additions of such in service station lines, arrangements and features. The conversion fee is specified in C.
4. Customers will be responsible to furnish all premises wiring, terminal equipment and jacks used with the *CENTRON* Custom Service.
5. The rates and charges specified for *CENTRON* Custom are in addition to the regular rates and charges for the services with which the *CENTRON* Custom is associated, e.g., WATS, etc.
6. One primary directory listing is furnished without charge for each *CENTRON* Custom system. Directory listings of main station lines may be provided at the regular business additional listing rate (CLT).
7. Transfer of calls will be provided on listed directory numbers on a total system disconnect only.
8. Customers not wishing to change their listed directory number to be part of a total *CENTRON* system may keep their existing number(s) as an option. See terminating listed directory numbers in this section.
9. Loop Diversity, Avoidance and Fiber Optic Protect Path defined in the Competitive Private Line Transport Services Price Cap Tariff is available with *CENTRON* Custom Service.

C. Rates and Charges - General

1. At the time a main station line is initially installed, it will be equipped with a main station line class of service, intercommunication, touch-tone and if desired, sequential, nonsequential or multiline hunting arrangement as determined jointly by the customer and the Company.
2. All applicable incremental charges as specified elsewhere apply.
3. The number of simultaneous exchange and long distance message network calls to and from main station line locations and attendant positions are controlled by the number of Network Access Registers.
4. In the event CO blocking occurs for a customer, a traffic measurement study will be required at rates and charges specified in 10.10.4 of the Exchange and Network Services Price Cap Tariff. When the blocking is due to an increase in customer usage, additional Network Access Registers will be added and the customer billed accordingly.
5. CENTRON Custom network access is available on a flat and measured rate basis. The usage charges specified elsewhere apply.
6. The provision of network access is based on the use of Company specified number of Network Access Registers as required by the number of main station lines which will be determined on a customer by customer basis.
7. A conversion charge will be assessed whenever a customer converts from an ESS serviced Centrex CO or ESSX-1 to CENTRON Custom.

	CONVERSION CHARGE MAXIMUM	CURRENT
• Conversion from Centrex CO to CENTRON Custom	\$1,200.00	\$600.00
• Conversion from ESSX-1 to CENTRON Custom	500.00	250.00

109.1.16 CENTREX PLUS SERVICE

Effective September 1, 2004, Centrex Plus Service is grandfathered to current customers. Customers currently on month-to-month arrangements will need to migrate to another Qwest service by December 1, 2004. Customers whose contract term expires on or after September 1, 2004, but before June 30, 2006, will be allowed to extend their contract, as long as they do not extend beyond June 30, 2006. All existing contracts whose term expires after June 30, 2006 will be honored, however, no contract extensions will be permitted.

A. Description

1. Centrex Plus Service is a business communications system furnished only from a Stored Program Controlled central office and is offered subject to the availability of facilities and applicable generic feature programs. A group of station lines is translated for an individual customer group and provides common access to a predetermined group of system features. Customers have a choice of access to the general network via each Centrex Plus station line (non-blocking) or controlled access (blocking) depending upon the number of Network Access Registers subscribed to by the customer as found in the Competitive Exchange and Network Services Price Cap Tariff.
2. Centrex Plus standard features include the following features depending upon the serving central office:
 - Audible Message Waiting
 - Automatic Call Back
 - Call Forwarding - Busy Line
 - Call Forwarding - Don't Answer
 - Call Forwarding - Variable
 - Call Hold
 - Call Park
 - Call Pickup

109. OBSOLETE CENTRAL OFFICE SERVICES

109.1 DIAL SWITCHING SYSTEMS

109.1.16 CENTREX PLUS SERVICE

A. Description (Cont'd)

4. Miscellaneous facility terminations are those lines and trunks which are not a basic part of the Centrex Plus system, e.g., Voice Grade Circuits, WATS, etc., but which require Centrex Plus switching capabilities in order to function with Centrex Plus Service. Each miscellaneous line that is terminated in a Centrex Plus system requires a termination arrangement.
5. Main station line features may be provided for attendant access lines where facilities permit.
6. Split service common equipment is required when a Centrex Plus customer desires to segregate the Centrex Plus station lines into separate groups, thereby enabling each group to have a different set of system common features.
7. Centrex Plus Service and features are provided up to the network demarcation at rates and charges specified herein. The customer will be responsible for provision of all wire and/or cable facilities on the customer's side of the network demarcation. Any such facilities installed by the Company will be provided on a time and materials basis.

B. Terms and Conditions

1. All Centrex Plus station lines must be associated with the main switching equipment. Other switching systems connected to a Centrex Plus system by Voice Grade Circuits or group use arrangements are considered as separate systems and are billed as such.
2. Customer requests for temporary suspension, either full or partial, of Centrex Plus Service is not permitted. Seasonal disconnects are allowed providing all rates and charges still apply.
3. Where a Stored Program Controlled CENTRON Custom customer elects to convert to Centrex Plus Service, nonrecurring charges do not apply to in-service station lines, terminating arrangements, and optional service features provided that (1) the customer's system continues to be served by the same switching equipment, (2) there is no interruption of service, and (3) there are no moves, changes or additions of such in service station lines, arrangements and features.

109.1 DIAL SWITCHING SYSTEMS

109.1.16 CENTREX PLUS SERVICE

B. Terms and Conditions (Cont'd)

4. Customers will be responsible to furnish all premises wiring, terminal equipment and jacks used with the Centrex Plus Service.
5. The rates and charges specified for Centrex Plus are in addition to the regular rates and charges for the services with which the Centrex Plus is associated, e.g., WATS, Voice Grade Circuits, etc.
6. One primary directory listing is furnished without charge for each Centrex Plus system. Directory listings of main station lines may be provided at the regular business additional listing rate (CLT) as specified in 5.7.1, preceding.
7. Transfer of calls will be provided on listed directory numbers on a total system disconnect only.
8. Customers not wishing to change their listed directory number to be part of a total system may keep their existing number(s); however, there would be a Centrex Plus chip-in charge for translating listed directory numbers from outside the Centrex Plus customer group. Centrex Plus Service chip-in occurs when a non-sequential telephone number or block of numbers is added to a new or existing sequential Centrex Plus number arrangement.
9. Each customer will be required to sign a service agreement for the furnishing of services on a rate stabilized basis.

Per Decision No. 68604

109. OBSOLETE CENTRAL OFFICE SERVICES

109.1 DIAL SWITCHING SYSTEMS

109.1.16 CENTREX PLUS SERVICE

B. Terms and Conditions (Cont'd)

10. After the service date, a customer removing station lines in whole or in part, below a minimum line commitment quantity, will be subject to a termination charge. A service date will be considered the date of initial installation of station lines for a new system or the effective date of a contract renewal for existing systems. A minimum line commitment will be considered to be 60% of the number of lines initially installed and in service on the annual anniversary date of the Rate Stability Agreement. Company billing records will serve as documentation of the number of lines in service for the purpose of establishing the minimum line commitment. During the first year of a Rate Stability Agreement, the minimum line commitment will be based on the total number of lines in service 60 days after the first line is installed for a new system or the number of lines in service upon renewal of a Rate Stability Agreement for an existing system. In subsequent years of an agreement the minimum line commitment will be based on the number of lines in service on the anniversary date of the agreement. The anniversary date will be considered to be the date of the last signature executing the agreement or a date specified in the agreement.

Termination charges will only be applicable to Centrex Plus main station lines unless other applicable elements are noted in an agreement. Termination charges are not applied to common equipment, or optional features.

11. Customers subscribing to the RSP shall be subject to the Termination Liability/Waiver Policy as set forth in 2.2.14.D. of the Exchange and Network Services Price Cap Tariff.
12. Nonrecurring charges can be spread over the life of the contract at the present cost of money to the Company.

109. OBSOLETE CENTRAL OFFICE SERVICES

109.1 DIAL SWITCHING SYSTEMS

109.1.16 CENTREX PLUS SERVICE

B. Terms and Conditions (Cont'd)

13. The customer may request a transfer of service from the customer premises location(s) to other customer premises location(s) within the Company's fourteen (14) state service area. The Company shall grant the customer's request if 1) necessary facilities are available; 2) the customer pays all uncollected costs associated with the original premises location including, but not limited to, stranded facilities costs, installation costs, labor costs, engineering costs, and service order charges; 3) the customer agrees to pay the recalculated monthly service charges and nonrecurring charges for the new location; 4) the move results in customer retaining in total the same or a greater number of Station Lines; 5) service is connected at the new location within thirty (30) days of the disconnect date at the old location; and 6) the Company and the customer execute either a written Supplement to this Rate Stability Plan or a new Rate Stability Plan, as is appropriate, with a term that is at least equal to the remaining term of this Rate Stability Plan. If the move results in the customer retaining in total fewer Station Lines or if service is not connected at the new location(s) within thirty (30) days of the disconnect date at the old location(s); the termination charge as specified in 2.2.14.D. of the Exchange and Network Services Price Cap Tariff applies.
14. Customer Location

Customer primary location is that customer location within the area of their current serving CO designated on the customer's billing record.

Customer secondary location is a customer location other than the primary location served by one or more lines of the Centrex Plus system.
15. Centrex Plus Service is not available on Public Communications Service or Multiparty Service.
16. A customer may choose to combine station lines terminating at different locations into a single system. All station lines terminating in a system must be served by the same CO. Lines terminating or originating in different exchange or COs are subject to rates and charges found in the Competitive Private Line Transport Services Price Cap Tariff.
17. The quality of transmission for calls utilizing Call Forwarding or Conferencing may vary depending on the distance and routing involved. For an enhanced quality of transmission, line conditioning is available at appropriate rates and charges as found in 5.4.5, preceding.

109.1.16 CENTREX PLUS SERVICE

B. Terms and Conditions (Cont'd)

18. Centrex Plus Service requires special CO equipment and is not provided in all COs. The Company may furnish Centrex Plus where there is available facilities and CO equipment, with the proper program updates, as determined by the Company.
19. Centrex Plus Optional Features will be furnished only where facilities permit as determined by the Company.
20. Centrex Plus telephone numbers may be sequential or nonsequential. Sequential numbers may be assigned if blocks of numbers are available and at the discretion of the Company. Customers requesting that numbers in a sequential block be removed from the block will be charged a Block Compromise Charge as specified in 5.3,4, Direct-Inward-Dialing Service, preceding.
21. Customers may reserve additional telephone numbers for future use at the rates specified in 5.3,4, Direct-Inward-Dialing Service, preceding.
22. Loop Diversity, Avoidance and Fiber Optic Protect Path defined in the Competitive Private Line Transport Services Price Cap Tariff is available with Centrex Plus Service.

C. Rates and Charges - General

1. Each Centrex Plus station line will include the common line facility and the standard features as appropriate. Each station line will be equipped with 3-way calling, consultation hold, transfer, and intrasystem calling. The remaining standard features may be selected on a line-by-line basis as determined jointly by the customer and the Company.
2. Rates and charges for the common line facilities will be charged according to the number of station lines per location. Each different location will begin with the 1-20 station line charges. The common line facilities between 21-50 will have different rates and charges. Common line facilities for 51 station lines and over will be charged according to the distance of the station line from the serving central office, in quarter mile increments. Customers may add lines to a Centrex Plus system at the rates and charges in effect at the time the customer signed the Rate Stability Plan agreement.
3. Centrex Plus rates and charges will be developed on an individual case basis when unique engineering and/or customer specified dedicated investment is required.

9. Digital Facility Interface

a. Description

This termination provides a digital interface for a high capacity (1.544 Mbps) facility which terminates to a customer's central office based switching system. This service provides for the connectivity of 24 circuits within the Centrex Plus system.

b. Terms and Conditions

The rates and charges for the Digital Facility Interface are in addition to the rates and charges applicable for the appropriate high capacity facility. All current rules, terms and conditions, including Federal regulations apply to the application of the high capacity facility.[1]

Digital Facility Interface will only be offered to Centrex Plus customers, and will only provide for tie lines in a non-tandem configuration.

c. Rates and Charges

	USOC	NONRECURRING CHARGE[2]	
		MAXIMUM	CURRENT
• Common Equipment[3]			
- Per digital interface unit, per 1.544 Mbps facility	D1E1X	\$510.00	\$255.00

[1] The High Capacity facility as found elsewhere should be rated as if it terminates to an end user's premises. The Centrex Plus in this case is the end user's premises.

[2] Applies on initial and subsequent activity.

[3] For Centrex Plus to Centrex Plus connections two Digital Facility Interfaces will be required, one at each end.

E. Standard Service Features - Description

Audible Message Waiting

When a Centrex Plus user goes off hook a stutter dial tone is provided to indicate a message is waiting.

Automatic Callback

Provides an arrangement that permits a line user, when attempting an intercom call to a busy line, to be automatically connected to that line when both the called and calling lines are subsequently idle.

Call Forwarding Busy Line

Provides for forwarding of incoming calls to a preselected telephone number, when the called station is busy.

Call Forwarding Don't Answer

Provides for forwarding of incoming calls to a preselected telephone number, when the called station does not answer after a predetermined number of ringing cycles.

Call Forwarding-Variable

Allows a user to automatically forward incoming calls to any other number.

Call Forwarding of Call Waiting Calls

Allows users with both the Call Waiting and Call Forward Don't Answer features to have calls directed to a predetermined destination.

Call Hold

Allows a station user to hold any call in progress, by dialing a code.

Call Park[1]

Allows a user to hold or "Park" a call by dialing a code that can be retrieved from any station by dialing another code.

Call Pick-Up

Enables a station user to answer calls directed to other specified stations by dialing a special code.

Call Waiting - Dial Originating

Provides the ability for the originating station to invoke call waiting tone on selected calls by dialing the dial call waiting access code followed by the extension number of the station to be call waited.

Call Waiting - Originating

Allows a calling station to direct a call waiting tone toward a busy called station within the same system.

Call Waiting - Terminating

Allows for a Centrex Plus station user who is engaged in a telephone conversation to be alerted via an audible tone that a call is waiting.

Cancel Call Waiting

Allows a user with Call Waiting Terminating to inhibit the application of Call Waiting Tone for the duration of one call by dialing a code.

Conference Calling

Allows a station user to establish conference connections without the aid of an attendant.

Data Call Protection

Provides a no double connect option to the line, protecting data calls from interruption.

Direct Inward/Outward Dialing

Allows station users to place or receive calls bypassing the attendant.

Distinctive Ringing/Distinctive Call Waiting Tone

Enables a station user to determine the source of an incoming call.

F.7.b.(1) (Cont'd)

Feature Move, Add, and Change

The ability to perform station number changes and to move, add, or change most features on the system from customer-provided equipment located on the customer's premises.

Transactions will either be put in a batch or priority transmission status. A batch transmission constitutes transactions scheduled for the current day or some future date. Priority functionality is described in standard features.

CMS will process batch change requests, which have accumulated throughout the day during off-peak load hours, overnight, or at a customer-specified future date.

Change request transactions can be created for station line numbers, authorization codes, automatic route selection, packet telephone numbers, and telephone number swaps. Depending on the type of change request, CMS will display different screens. CMS customers may manipulate most features and options displayed on a given screen. When the customer submits the changes, a pending record is created and CMS counts this change request as one single transaction. All change request transactions are cumulative; CMS tallies all daily transactions and will not process any transactions that exceed batch or priority parameter limits.

The number of batch change request transactions that a customer can enter per effective date will be determined by the number of Centrex lines per database. Refer to the following table. Up to 60 pairs of telephone numbers can be swapped per day. These changes take place overnight or at some future date as determined by the customer.

NUMBER OF LINES PER DATABASE	NUMBER OF BATCH	NUMBER OF BATCH DBSYNCHS
1 - 2000	100	10
2001 - 4000	110	15
4001 - 6000	120	20
6001 - 8000	130	25

F.7.b.(1) (Cont'd)

Network Manipulation

Dependent on central office switching technology, customers can manage a range of network features:

- 1AESS - can change the Facilities Restriction Level (FRL) on Electronic Tandem Service (ETS) station numbers.
- 5ESS - Automatic Route Selection (ARS) Active Pattern Group modifications, as well as Time of Day Routing, FRL, and Expensive Route Warning Tone.
- DMS100 - Network Class of Service (NCOS) modifications, as well as Time of Day Routing and Expensive Route Warning Tone.

Priority Service

Allows customers to request priority transmission of transactions which are then processed in the serving central office. This may be defined as same-day service. The number of priority change transactions a customer may enter per day will be determined by the number of Centrex lines per database. Refer to the following table. Up to 5 pairs of telephone numbers can be swapped per day.

The Company does not guarantee specific time frames for completion of priority transactions.

NUMBER OF LINES PER DATABASE	NUMBER OF BATCH	NUMBER OF BATCH DBSYNCHS
1 - 2000	20	10
2001 - 4000	30	15
4001 - 6000	40	20

Bulk Change

Allows customers to request the same feature change to be applied to multiple lines simultaneously.

Telephone Number Swaps

The ability to exchange all service option assignments and features from one station line to another.

(2) Optional Features

The following optional features carry an additional one-time establishment charge.

Custom Reports

Customers can request Company personnel to create customized report formats for various aspects of their system. Once created, the custom report is stored in the customer's data base and can be utilized at any time.

System Partitioning

The Company, upon the customer's request, can partition the Centrex customer group into separate databases representing different customer groups. Each partition is assigned a distinct customer identification name (Customer ID), and can be arranged to be accessible only to certain users designated by the customer.

Packet Control Capability

Gives Centrex customers with ISDN, the ability to manage their packet control features. Customers that subscribe to the Packet Control Capability can verify current and pending packet options, add, delete or change packet options and run reports regarding packet assignments.

F.7. (Cont'd)

c. Terms and Conditions

The Company will furnish and maintain CMS software for use by the customer. CMS requires special central office equipment and is not provided in all central offices. The Company will offer CMS where there is available facilities and central office equipment as determined by the Company.

The customer must obtain and maintain a compatible computer terminal for use with CMS. The computer terminal will not be furnished by the Company. A business exchange access line or Centrex Plus main station line is also required, which is in addition to the rates and charges for CMS.

CMS is available for access by the customer 23 hours a day, seven days a week. A Company technician will be available Monday-Friday 7:00-5:00 to assist CMS customers with their problems and questions.

The Company reserves all rights to take the CMS computer down for software updates or maintenance as required. When possible, software updates will be done during off-peak hours and customers will be warned in advance. Maintenance routines will be done the third week-end of every month.

The Company does not implicitly warrant CMS from any unforeseen software or hardware problems where an entire customer database is lost. The Company will re-establish the database if lost.

All normal and emergency central office functions have priority over customer requested changes. The Company assumes no responsibility for change requests delayed by such Company functions.

The Company will provide the customer a CMS User Handbook and training at the time of initial installation. The Company reserves the right to upgrade or change CMS at anytime. Any additional customer training or documentation requirements resulting from such changes will be supplied at no charge.

F.7.c. (Cont'd)

New connects and disconnects of station lines are not permitted through CMS.

The customer assumes full responsibility for the features managed by CMS. The Company will not maintain a separate record of which features are activated on each station line.

CMS software allows the customer to move and change station numbers within their system, the customer will be responsible for labeling the Network Interface when number changes occur. All maintenance calls to the Company in which the trouble proves to be other than on the Company side of the Network Interface will result in the application of Trouble Isolation Charges, as specified elsewhere. The Trouble Isolation Charge will not apply to lines equipped with Business *UNISTAR* Service.

d. Rates and Charges

All nonrecurring charges for CMS will be applied on a per common block system basis. Nonrecurring Charges, found elsewhere do not apply when the customer moves, activates, deactivates, changes features and moves or changes lines through CMS.

An initial Service Establishment Charge will be applied to the first Customer ID. A subsequent System Establishment Charge will be applied to succeeding Customer ID's providing the customer manages all CMS changes from only one central location.

9. Electronic Set Service[1]

a. Description

Electronic Set Service permits the use of special electronic station sets with Centrex Plus Service. This service utilizes a unique line card to provide communications control for the electronic station set.

The customer-provided electronic set is a touch-tone station that provides programmable keys for features and additional numbers. It is served from the central office by a main or extension station line. It has assignable keys for station line pick-ups or features. Electronic sets and adjunct modules are provided by the customer.

b. Terms and Conditions

Electronic Set Service will be provided only where facilities permit.

Each electronic set must be associated with a Primary Directory Number. In addition, an Electronic Set Service interface card is required.

Electronic Set Service is subject to a 1.5 mile limitation from the central office.

[1] Available only from a DMS-100 central office.

F.9.b. (Cont'd)

Electronic Set Service is only available on Centrex Plus main station lines. Main station lines with electronic sets cannot have extension stations; however, the primary directory number associated with the main station line can appear as a secondary appearance of a primary directory number on other main station lines.

c. Explanation of Terms

Multiple Appearance Directory Number (MADN)

A directory number assigned to more than one electronic station set.

Software Numbers

Software numbers are numbers which do not require an additional station line. These numbers share the facilities of the primary directory listed number. Variations of software numbers are:

- Primary Appearance

The first appearance of a software number on a key.

- Secondary Appearance

The second appearance of a software number on a key. The secondary software number can be on the same station or a different station.

- Single Appearance

A software number that appears only on one station and one key.

f. Optional Feature Description

Direct Station Selection/Busy Lamp Field

Adds improved answering-position function to the electronic set by providing busy lamp status and direct station selection.

Message Center

Provides message center functionality to the electronic set. System users access the message center via dialing a code.

Station Camp-On

Allows the electronic set user to call a busy line and place the caller on hold/camp against the busy party's line until they are free.

15. Station Message Detail Recording[1]

a. Description

SMDR provides detail on calls that originate from a Centrex Plus common block system(s). Call detail may include: date, time, call duration, station line from which calls originated, called number and carrier selected. SMDR call detail is provided on originating Toll, Outward WATS, Voice Grade channels, Foreign Exchange Service and Directory Assistance calls. Local call detail also is available, requests will be on an individual case basis only.

A customer may use SMDR call detail for identifying, analyzing, and resolving internal network usage issues. The company does not represent SMDR call detail to be valid for billing purposes.

The type of call detail and the method by which it is obtained is dependent upon the type of SMDR technology deployed in the central office serving the customer. Two methods of receiving SMDR are, SMDR to Premises SMDR-P and SMDR Regional Accounting Office SMDR-RAO.

SMDR-P allows customers to obtain daily call detail on their outgoing chargeable calls. The customer's call detail records are stored by the SMDR-P equipment and delivered directly over an access line to the customer's premises. The detail is collected by a customer provided call detail recorder which is usually a customer's personal computer using call accounting software. Through the use of the call accounting package, customers are able to process the call details and generate management reports.

SMDR-RAO allows customers to receive call detail on a monthly basis via magnetic tape. The tape is offered within four categories: Miscellaneous SMDR, Large User Toll, Directory Assistance and WATS. Customers could receive up to four different tapes for their accumulated call detail. Magnetic tape records are in a standard industry-wide format called Exchange Message Record (EMR). A customer's in-house data processing equipment or outside data processor must be able to read this tape as to physical size as well as format.

APPROVED FOR FILING
DECISION #: 68604

[1] Customers signing a contract on or after February 24, 1994 will receive SMDR at rates and charges specified in the section. Customers that have RSP Arrangements prior to February 24, 1994 must sign a new RSP Arrangement to have SMDR from this Section.

F.15. (Cont'd)

b. Terms and Conditions

The terms and conditions specified herein are in addition to applicable terms and conditions specified elsewhere.

The customer is responsible for providing the necessary computer hardware and software for processing SMDR data. SMDR data delivered to customers by way of SMDR-P or SMDR-RAO is an electronic listing of call detail.

SMDR content is not represented as an image of a bill and is not a valid challenge to the accuracy of the bill.

Temporary suspension, either full or partial, of SMDR is not permitted.

The Company does not implicitly warrant SMDR from any unforeseen software or hardware problems where call detail records may be lost.

Customers not able to obtain SMDR-P may subscribe to SMDR-RAO.

The customer must obtain and maintain a compatible modem and call accounting package for use with SMDR-P. A business exchange access line, Centrex Plus station line, or Voice Grade Channel is required to provide SMDR.

The standard call data retrieval/delivery interval for SMDR-P is once daily. Customers must specify the time-of-day interval when they wish to retrieve or have the Company deliver their call detail.

SMDR-P customers wishing to retrieve call detail at intervals other than once daily, will be priced on an individual case by case basis.

F.15.c. (Cont'd)

SMDR-P has two delivery options: modem to modem or File Transfer Protocol (FTP). The customer's data may be forwarded at a customer specified time.

Call data remains on disk for five calendar days after the initial distribution of data to the customer. During this time, customers may request one resend of previously sent data at no charge. After five days, the call data is transferred to magnetic tape. Each customer's daily call detail will be stored on tape and archived for 30 days. This archived information will be made available for retransmission to the customer. A nonrecurring charge will apply for the retrieval of this archived data.

The Company reserves all rights to take SMDR-P down for a four and one half hour period every night to run backups and perform maintenance routines.

For SMDR-RAO the magnetic tape(s) will be sent to the customer once a month based on the Company's bill period date. Customers wishing to receive tapes at intervals other than one a month, will be priced on an individual case by case basis.

SMDR-RAO call data is available only for the previous month. An additional nonrecurring charge will be applied if the customer requests a resend of a previously delivered tape.

All nonrecurring charges for SMDR will be applied on a per common block system basis.

A Service Establishment Charge will be applied when all working and non-working station numbers in the customer's Centrex Plus customer group are loaded into the SMDR database at the time of initial installation of the system.

A retransmission of archived SMDR call detail charge, will be applied if a SMDR-P customer desires a resend of call detail originally transmitted within the previous 30 days.

Requests for SMDR call detail in a manner other than described herein will be considered non-standard and will be priced based upon individual customer requirements, cost and rate levels on a case by case basis. Non-standard provisioning of SMDR may include customer requests for local call detail, Company delivery of data for SMDR-P customers, or hourly retrieval of call data for SMDR-P customers.

G. Superseded Rate Stabilized Rates (Cont'd)

2. Effective March 19, 1998, the following rates and charges found in A.2. which became effective February 24, 1994 are only available to customers of record subject to the following Terms and Conditions.
 - a. Current Centrex Plus Month to Month customers have 90 days from March 19, 1998 in which to subscribe to Centrex Plus Service under a rate stabilized agreement in order to receive these superseded Centrex Plus station line rates. If a Month to Month customer has not signed a rate stability agreement before 90 days, they will be converted to the new rates effective 90 days after March 19, 1998.
 - b. During a five year period beginning on March 19, 1998 current rate stabilized customers may renew their contract at rates found in A.2., preceding. Renewal contracts must have an expiration date no longer than ten years from March 19, 1998. After a five year period, new rates would apply to any contract renewal.
 - c. Existing Centrex Plus customer growth limitations beginning March 19, 1998 are as follows:
 - Customers may add new common blocks to existing contracts.
 - Current Centrex Plus customers may add up to 20 additional locations annually. A customer may add new locations, beyond the 20 location limitation, if the customer purchases, merges and/or acquires a new business and wants the acquired business location(s) to be part of an existing Centrex Plus contract. A government customer may add new locations, beyond the 20 location limitation, as a result of the government entity's realignment. The location growth limitation will apply following acquisition or government realignment activity.
 - Current customers may move and change station lines and optional features at existing locations per terms of the contract. Customers with 1 to 100 stations, may add up to 100% of their current stations annually. Customers with more than 100 stations lines may add up to 100% of their current station lines every two years per terms of the contract. These numbers cannot be compounded. Acquisitions or government realignment will not count towards the station line growth limitation.
 - d. The sum of the End User Common Line Charge and the Rate Stabilized flat station line charge will remain the same during the Rate Stability term.

109. OBSOLETE CENTRAL OFFICE SERVICES

109.1 DIAL SWITCHING SYSTEMS (Cont'd)

109.1.17 CENTREX 21 SERVICE

Effective April 11, 2005, Centrex 21 Service is obsolete and not available to new customers. Customers will be allowed to retain their obsolete service only as long as service remains at the same location for the same customer.

A. Description

1. Centrex 21 Service is a flat rate, business service for customers with 2 to 50 station lines. Centrex 21 Service is furnished only from a Stored Program Controlled central office offered subject to the availability of facilities and applicable generic feature programs and will not be available in a 2BESS Central Office. Centrex 21 consists of standard features which are available to all station lines in the shared customer group where available. A Centrex 21 customer has a choice of having the features delivered via analog lines and/or 2B+S, (digital, voice only) ISDN lines. Optional features are also available.
2. Centrex 21 standard features include the following features depending upon the serving central office:

FEATURE	ANALOG	DIGITAL VOICE

109.1.17 CENTREX 21 SERVICE (Cont'd)

B. Terms and Conditions

1. Centrex 21 Service ISDN station lines will be offered, from the customer's local serving Central Office only. ISDN Service from the Central Office is generally considered "available" for loops of 18 kilofeet or less in length. Loops greater than 18 kilofeet in length must meet extension technology design requirements. Service will be considered available if ISDN compatible pair gain systems or single line loop extension equipment are in place to serve the area.
2. Rates and charges for the Centrex 21 ISDN 2B+S, (digital, voice only) lines do not include extended ISDN availability arrangements. Extended ISDN availability arrangements are only available on an individual case basis.
3. Centrex 21 Service equips the station lines in the system with all the standard features. Customers subscribing to this service are required to pay the monthly rates for service, whether or not all standard features are activated at initial installation.
4. The monthly rate for Centrex 21 Service covered under the Rate Stabilized Plan is guaranteed against Company initiated changes for the duration of the plan. The minimum Rate Stabilized Plan is 12 months. The maximum Rate Stabilized period is 60 months.
5. Customers subscribing to an unexpired Standard Rate Stability Plan as of April 11, 2005, may add station lines at the same location to an existing system at the rates originally applicable to that customer. Customers whose station line growth exceeds 50 station lines have the option to convert to other Company Services. The service period for converted Company Services will bear the same expiration date as that of the customer's original Rate Stability Plan.
6. Customers will be responsible to furnish all premises wiring, terminal equipment and jacks used with the Centrex 21 Service.
7. All Centrex 21 Service station lines must be associated with the same customer group.
8. Customer request for temporary suspension, either full or partial, of Centrex 21 Service is not permitted. Seasonal disconnects are not allowed.

B. Terms and Conditions (Cont'd)

9. One primary directory listing is furnished without charge for each Centrex 21 system. Directory listings of station lines may be provided at the regular business additional listing rate as specified in 5.7.1, preceding.
10. Intercept Service will be provided on the main listed directory number for a total system disconnect only.
11. Customers may reserve additional telephone numbers for future use at the rates specified in 5.3.4, preceding.
12. If a customer terminates the agreement before the established service date, in whole or in part, the customer will pay cancellation charges as defined under the Termination Liability/Waiver Policy as set forth in 2.2.14. of the Exchange and Network Services Price Cap Tariff.
13. After the service date, if a customer with a fixed-period rate plan removes, in whole or in part, station lines to a level less than 70% of the initial number of station lines, a termination charge may apply, as defined in 2.2.14 of the Exchange and Network Services Price Cap Tariff.
14. The customer may substitute Centrex 21 Service with another Company service that functionally replaces Centrex 21 Service and provides equivalent or greater feature functionality as defined in 2.2.14 of the Exchange and Network Services Price Cap Tariff.
15. Centrex 21 Service is not available on Public Communication Service or multiparty service.
16. The quality of transmission for calls utilizing Call Forwarding or Conferencing may vary depending on the distance and routing involved. For an enhanced quality of transmission, line conditioning is available at appropriate rates and charges as found in 5.4.5, preceding.

109. OBSOLETE CENTRAL OFFICE SERVICES

109.1 DIAL SWITCHING SYSTEMS

109.1.17 CENTREX 21 SERVICE

B. Terms and Conditions (Cont'd)

21. Electronic Business Set is subject to a 1.5 mile limitation from the central office.
22. Electronic Business Set is only available on Centrex 21 main station lines. Main station lines with electronic sets cannot have extension stations; however, the primary directory number associated with the main station line can appear as a secondary appearance of a primary directory number on other main station lines.
23. In order for Wireless Extension to work, the customer's wireless carrier must utilize technology that links their network to the Company's network and provides the wireless handset status to the Company upon request. It will be the customer's responsibility to know whether their wireless carrier provides this data.
24. For customers with a standard RSP on or after April 11, 2005, the Termination Liability will be waived when changing to a *QWEST* voice line service.

109.1 DIAL SWITCHING SYSTEMS

109.1.17 CENTREX 21 SERVICE (Cont'd)

C. Standard Service Feature - Description

Primary Directory Number (PDN)[1]

Each terminal is assigned one Primary Directory Number. If more than two terminals are attached to a Basic Rate Access Connection, additional Primary Directory Numbers will be required. The maximum allowable number of Call Appearances (PDN, SDN or shared) will be determined by the CPE and configuration groups selected.

Secondary Directory Number (SDN)

A Secondary Directory number is any directory number, other than the Primary Directory Number, assigned to an ISDN terminal. The standard package includes one SDN. The maximum allowable number of Call Appearances (PDN, SDN or shared) will be determined by the CPE and configuration groups selected.

Multiple Shared Call Appearances of a Directory Number[2]

This feature allows several station sets to share one or more Call Appearances of a particular directory number (PDN or SDN). The originating and terminating events on one station set affects all stations that share Call Appearances for a particular directory number. The shared directory number can have up to eight Call Appearances. Multiple calls can exist on one directory number and more than one station sharing the directory number can have a call active on the shared directory number.

[1] Customers may choose from any of the existing standard configuration groups for their system.

[2] On a DMS-100 Central Office, this feature requires MADN as well.

109. OBSOLETE CENTRAL OFFICE SERVICES

109.1 DIAL SWITCHING SYSTEMS

109.1.17 CENTREX 21 SERVICE

C. Standard Service Feature - Description (Cont'd)

Call Drop

This feature allows the user (who is the controller of a call) to drop the last party that was added to a conference call. Also, this feature allows a user to disconnect a 2-party call.

Call Exclusion

Manual Call Exclusion restricts other stations from picking up a call on hold or bridging onto an active call at that station.

Call Forwarding Busy Line

Provides for forwarding of "all" calls to a preselected telephone number when the called station is busy.

Call Forwarding Don't Answer

Provides for forwarding of "all" calls to a preselected telephone number, when the called station does not answer after a predetermined number of ringing cycles.

Call Forwarding-Variable

Allows a user to automatically forward "all" calls to any other number.

Call Hold[1]

Allows a station user to hold any call in progress by dialing a code.

Calling Identity Delivery on Call Waiting - Number[2,3]

Provides calling number delivery following the call waiting tone.

Call Pick-Up

Enables a station user to answer calls directed to other specified stations by dialing a special code.

[1] Provided by proprietary CPE on ISDN.

[2] Requires CPE that has a display.

[3] Not available from DMS-10, DMS-100, and AXE -10 Central Offices.

Issued: 4-24-06

ORIGINAL

Effective: 5-1-06
Per Decision No. 68604

109. OBSOLETE CENTRAL OFFICE SERVICES

109.1 DIAL SWITCHING SYSTEMS

109.1.17 CENTREX 21 SERVICE

C. Standard Service Feature - Description (Cont'd)

Call Transfer

Allows a station line user to transfer any established call to another station line without the assistance of an attendant. This feature also utilizes the switchhook to put a caller on consultation hold.

Call Waiting

- Terminating - All Calls
 - Allows for a Centrex 21 station user who is engaged in a telephone conversation to be alerted via an audible tone that a call is waiting if the called station line is busy.
- Cancel Call Waiting
 - Permits a Call Waiting customer to inhibit the call waiting operation for one call through the use of a cancel call waiting code.

Caller Identification - Number[1]

Provides visual indication of the calling number from an outside party, assuming the incoming call has calling party number associated with it and the originating caller has not blocked presentation of calling party number.

Conference Calling

Allows a station user to establish conference connections without the aid of attendant or operator assistance. 3-Way allows a station in the talking state to add a third party to the call; 6-Way allows a station user to add up to five other parties.

Direct Dialing/Originating Terminating

Allows station users to place or receive calls.

[1] Requires CPE that has a display.

Issued: 4-24-06

ORIGINAL

Effective: 5-1-06
Per Decision No. 68604

109. OBSOLETE CENTRAL OFFICE SERVICES

109.1 DIAL SWITCHING SYSTEMS

109.1.17 CENTREX 21 SERVICE

C. Standard Service Feature - Description (Cont'd)

Display

Identifies incoming internal (i.e., intrasystem-system) calls by phone number and call type (e.g., internal, external, forwarded). This feature identifies why calls have forwarded from a specific number (e.g., busy, no answer). Requires electronic set equipped with appropriate alphanumeric LCD.

Hunting

- Automatically re-routes incoming calls to other lines when the calls encounter busy lines. Hunting groups provide a software-defined search for an available Call Appearance to which a call can be completed. A hunt group member is defined as a set of Call Appearances at the ISDN station.
 - Multi-Line Hunt Group (MLHG) - provides a sequential hunt over the members in the Multi-Line Hunt Group. When a Call Appearance is busy, the system sequentially hunts only the members following the member associated with the dialed number.
 - Circular Hunting - allows all lines in a multi-line hunt group to be tested for busy, regardless of the point of entry into the group. When a call is made to a line in a Multi-Line Hunt Group, a regular hunt is performed starting at the station associated with the dialed number. It continues to the last station of the Multi-Line Hunt Group then proceeds to the first station in the group and continues to hunt sequentially through the remaining lines in the group.
 - Series Completion - this feature allows calls made to a busy directory number to be routed to another specified directory number. The series completion hunting begins with the originally dialed member of the series completion group and searches for an idle directory number from the list of directory numbers.

Individual Line Billing

Toll calls are billed directly against the line placing the call.

Intercept

Disconnected or unassigned lines can be advised of a new number or given a disconnect recording.

109. OBSOLETE CENTRAL OFFICE SERVICES

109.1 DIAL SWITCHING SYSTEMS

109.1.17 CENTREX 21 SERVICE

C. Standard Service Feature - Description (Cont'd)

Incoming Calling Identification[1]

Provides user with visual feedback concerning the calling number from an outside party, assuming they do not have Call Blocking, when the electronic set is equipped with appropriate alphanumeric LCD. Name is not available with ISDN.

Message Waiting Service

- Audible Waiting Indication - when a user goes off hook a stutter dial tone is provided to indicate a message is waiting.
- Visual Waiting Indication - provides a message waiting indication on an electronic set via a message waiting lamp.[2]

Speed Calling

Allows a user to place calls to a list of frequently dialed numbers by dialing a one digit speed calling code for a 6 number list, or a 2 digit speed calling code for a 30 number list.

Standard Configuration Group

The standard system design allows users to select from a variety of predetermined configuration groups to support ISDN terminals.

Touch-Tone

Allows for Customer provided equipment to place calls on their Centrex 21 system using Dual-Tone Multi Frequency dialing.

[1] Requires CPE that has a display.

[2] Visual waiting indication available with special CPE.

Issued: 4-24-06

ORIGINAL

Effective: 5-1-06

109.1 DIAL SWITCHING SYSTEMS

109.1.17 CENTREX 21 SERVICE (Cont'd)

D. Optional Service Feature - Description

Additional Secondary Directory Number (SDN)

Allows more than one Secondary Directory Number to be assigned to an ISDN terminal.

Analog Call Appearance

This feature enables analog station users to share their call appearance on a user's ISDN station set. All Analog Call Appearances must be provisioned from the Centrex 21 central office that is providing the ISDN services. One appearance, per number, per terminal is allowed.

Call Park

Allows a user to hold or "Park" a call by dialing a code that can be retrieved from any station by dialing another code.

Caller Identification - Name and Number[1]

Allows for the automatic delivery of a calling party's name and telephone number (including nonpublished and nonlisted telephone numbers) to the called customer, which gives the called customer an opportunity to decide whether to answer the call immediately or not. The name and number are displayed on customer provided equipment.

Scheduled Call Forwarding[1]

Allows all incoming calls to be forwarded to another telephone number. It allows a customer to remotely change the termination of their incoming calls and base the termination upon a time schedule. From any tone signaling telephone, the customer can activate, deactivate, or change the times, days and destination numbers.

[1] For Terms and Conditions see 5.4.3, preceding.

Issued: 4-24-06

Effective: 5-1-06
Per Decision No. 68604

109. OBSOLETE CENTRAL OFFICE SERVICES

109.1 DIAL SWITCHING SYSTEMS

109.1.17 CENTREX 21 SERVICE

D. Optional Service Feature - Description (Cont'd)

Minutes Free[1]

The monthly rate for Centrex 21 Service will include a designated number of minutes of intraLATA toll. For all additional plan calls, the customer will be charged a special rate specified in 106.3.18, preceding.

Remote Access Forwarding (Call Following)[2]

Allows all incoming calls to be forwarded to another telephone number. It allows the customer to remotely change the termination of their incoming calls. From any tone signaling telephone, the customer can activate, deactivate, or change the destination number.

Wireless Extension[2]

A wireline forwarding service that works with a customer's wireless service. When a call is placed to the wireline number, it is automatically forwarded to a designated wireless number if the handset is turned on. If the wireless handset is turned off or is busy, the call rings at the wireline number and is not forwarded. In addition, any call coming from the designated wireless number to the wireline number will not be forwarded back to the wireless number.

[1] For Terms and Conditions see 106.3.18, preceding

[2] For Terms and Conditions see 5.4.3, preceding.

109. OBSOLETE CENTRAL OFFICE SERVICES

109.1 DIAL SWITCHING SYSTEMS

109.1.17 CENTREX 21 SERVICE

D. Optional Service Feature - Description (Cont'd)

Electronic Business Set

Electronic Set Service permits the use of special electronic station sets with Centrex Plus Service. This service utilizes a unique line card to provide communications control for the electronic station set.

The customer-provided electronic set is a touch-tone station that provides programmable keys for features and additional numbers. It is served from the central office by a main or extension station line. It has assignable keys for station line pick-ups or features. Electronic sets and adjunct modules are provided by the customer.

- Multiple Appearance Directory Number (MADN)
 - A directory number assigned to more than one electronic station set.
- Software Numbers
 - Software numbers are numbers which do not require an additional station line. These numbers share the facilities of the primary directory listed number. Variations of software numbers are:
 - Primary Appearance - The first appearance of a software number on a key.
 - Secondary Appearance - The second appearance of a software number on a key. The secondary software number can be on the same station or a different station.
 - Single Appearance - A software number that appears only on one station and one key.

Nonstandard Configuration Group

Allows customers to purchase additional configuration groups (beyond the five standard configuration groups provided) to support ISDN terminals.

109.2 EMERGENCY REPORTING SERVICE

109.2.3 EMERGENCY ALARM AND REPORTING SERVICE[1]

A. Public Emergency Reporting Service - Small Office

1. Description

- a. Public Emergency Reporting Service is designed for use of police and volunteer fire departments, etc., in small manual and community dial exchanges. The system is arranged so that the line associated with the telephone number designated to receive fire or other emergency reporting calls may be terminated in a number of telephones at various locations in the exchange. This arrangement will permit a number of people to receive emergency calls and sound the alarm where required.
- b. The telephone lines are not used for regular exchange telephone service. Telephones may be equipped with a signal key to actuate the customer-provided remote warning signal.
- c. A maximum of 10 telephones may be provided on a system. The telephone line at the location where emergency calls are generally received is the main station line. Telephone lines at all additional emergency reporting locations are considered extension station lines. Control equipment may be used to actuate a maximum of four remote signals.
- d. The customer releases, indemnifies and holds harmless the Company from any and all loss, claims, demands, suits, or other action, or any liability whatsoever, whether suffered, made, instituted or asserted by the customer or by any other party or person, for any personal injury to or death of any person or persons, or for any loss, damage or destruction of any property, whether owned by the customer or others, caused or claimed to have been caused directly or indirectly by the installation, operation, failure to operate, maintenance, removal, presence, condition, location or use of equipment or facilities associated with this service.

109.5.3 SCOOPLINE SERVICE (SLS)

A. General

1. Definitions

Client

A caller to a ScoopLine Service number is a "Client" of a sponsor.

Sponsor

An information provider is a "Sponsor" for an Announcement Service.

Sponsor Selected Pricing

A pricing plan which allows a sponsor to select the price that a client will be billed for a call to his Announcement Service.

Sponsor Remittance Service

That portion of the Sponsor Selected Price which exceeds the Company's charges per call, and which will be remitted to the sponsor via this service. This service also provides a summary of the calls on which the remittance is based.

Interactive Programs

A program or service whereby a caller, once connected to a sponsor's equipment, can, through the use of a touch-tone pad or similar device, access more specific or individualized announcement information, or live conversation. A touch-tone pad may not be required for live conversation.

Contractual Agreement

A specific contract between the sponsor and the company detailing the actual Sponsor Selected Price for each ScoopLine Service telephone call.

Overflow Call

When all lines going to a sponsor's equipment are carrying calls and an additional caller encounters a busy condition.

109.5.3 SCOOPLINE SERVICE (SLS)

A. General (Cont'd)

2. Description of Services and Offering

- a. ScoopLine Service (SLS) consists of service and facilities for sponsor provided pre-recorded announcements or interactive programs within the Phoenix and Tucson LATAs. This service enables a client, for a charge, to dial an SLS telephone number and receive an SLS sponsor's pre-recorded announcement or to participate in an interactive program. As an integral part of the service, the Company will deliver calls and bill clients on behalf of the sponsor. Each completed call to an SLS number will be recorded and a charge will be made to the client, unless otherwise agreed upon in the contractual agreement between the Company and the sponsor.
- b. The Company reserves the right to evaluate live voice applications and any applications that do not provide continuous programming 24 hours a day, e.g., a client service which may result in long holding times by the client and create CO blocking. Such applications will be reviewed on an individual case basis and allowed only if facilities permit.
- c. An SLS sponsor functions as an information provider who wishes the Company to bill clients on his behalf for each call completed to the sponsor's announcement or interactive programs, and for whom the Company agrees to provide such billing.
- d. The sponsor is responsible for establishing the SLS per call charge assessed to the client. Calls placed on a toll basis are subject to the toll schedule of charges in addition to the SLS client charge.
- e. A portion of the Sponsor Selected Price billed by the Company will be remitted to the particular SLS sponsor, based upon the contractual arrangement between the Company and the sponsor. The remainder will be retained by the Company at the rates specified herein.
- f. SLS calls are not included in local flat rate service charges.
- g. All SLS calls will be identified on the client's telephone bill as announcement calls showing the SLS number called and the amount billed.

109.5.3 SCOOPLINE SERVICE (SLS)

A.2. (Cont'd)

h. The following calls will be denied access to SLS:

- All third-party, collect and calling card calls.
- Calls from PSP pay telephones.
- Calls from WATS access lines.
- Calls from toll denied or restricted lines.
- Calls from hotel/motel and hospital toll trunk service lines that are routed to special operator equipped locations, as appropriate, e.g., TSPS.
- Calls from lines with Selective Class of Call Screening (SCCS).
- Feature Group A, B, C, and D lines.
- Calls originating outside the boundaries of the LATA containing the SLS Serving Exchange.

Due to technical or nontechnical conditions, certain other types of calls may, from time to time, be restricted from calling SLS telephone numbers. The Company reserves the right to determine which types or classes of calls will be permitted access to SLS telephone numbers.

Due to technical or nontechnical conditions, the Company may not, from time to time, be able to deny all calls as identified above. Calls of this nature will not be included in the remittance process.

- i. SLS access lines are provided as in-only service in hunting groups; that is, they are only able to receive calls, not to originate them.
- j. The telephone numbers assigned to SLS access lines are restricted to the 976 prefix in the Phoenix LATA and 676 in the Tucson LATA. A 1+976-XXXX/1+676-XXXX dialing pattern will be used.

109.5.3 SCOOPLINE SERVICE (SLS) (Cont'd)

B. Terms and Conditions

1. Provision of Service

- a. The provision of SLS access by the Company for the transmission of announcement or interactive program services is subject to the availability of facilities and the requirements of the local and toll network. In no event shall the Company be liable for any losses or damages of any kind resulting from the unavailability or failure of its equipment or facilities or for any act, omission or failure to perform by the Company, or its employees, or agents, in connection with this service. The Company shall not be responsible for calls that cannot be completed as a result of repair or maintenance difficulties on Company facilities and equipment, nor on equipment provided by the sponsor, nor for calls that are completed but cannot be billed.
- b. The locations of central offices providing SLS are entirely at the selection of the Company. SLS is available on a Foreign Central Office (FCO) and Foreign Exchange (FX) basis to sponsors located outside the selected central office serving area at the FX and/or FCO rates and charges specified in other applicable offerings, provided that such service does not cross the boundary of the LATA within which the serving central office is located.
- c. SLS will be furnished only when the sponsor contracts for as many local access lines and provides sufficient announcement equipment initially and subsequently, as may be required, in the judgment of the Company, to adequately serve all calls to a given SLS telephone number. Regardless of the volume of calls anticipated, a minimum of two lines are required for each SLS telephone number.

109.5.3 SCOOPLINE SERVICE (SLS)

B.1. (Cont'd)

- d. There will be a charge assessed for overflow calls (busies) as specified in E.1.c., following. The charges will be applied on a per call basis to overflow calls in excess of 35 per day.
- e. A written notice will be sent to any sponsor following oral notification when their service unreasonably interferes with or impairs other services rendered to the public by the Company or by other sponsors of SLS. If after notification, the sponsor makes no modification in method of operation or in the service arrangements that are deemed service-protected by the Company, or if the sponsor is unwilling to accept the modifications, or if the sponsor continues to cause service impairment, the Company reserves the right, at any time without notice, to institute protective measures, up to and including termination of service. In an emergency situation, as determined by the Company, the Company reserves the right to interrupt service without advance notice, or to institute whatever other protective measures are required.
- f. Credit on the recurring monthly rate will be granted only when SLS is interrupted for 24 consecutive hours or more. Interruption of service does not include, and no allowance shall be granted for service difficulties such as sponsor equipment failure, slow dial tone, circuits busy or other network and/or switching capacity shortages.

When one or more of the SLS access lines are verified to have been out of service for Company reasons, or when all lines are verified to have been made busy in the CO in response to a power failure, a charge will not apply to overflow calls in excess of 35 described in B.1.d., above, that are to be billed for that day.

- g. If service is disconnected, all remittance money due the sponsor may be applied to any final bill issued for charges associated with this offering or others.

B.1. (Cont'd)

- h. The holding time for each recorded announcement shall not exceed 60 seconds or one complete cycle of a 60 second message unless otherwise stated and agreed upon by both parties. If the agreed upon holding time does exceed 60 seconds, the sponsor will pay the rate for additional holding time increments.
- i. Sponsor requests for Custom Number Service are granted under rates, charges, terms and conditions, as outlined in 5.7.7, preceding. The rules and regulations specified in Section 2 of the Exchange and Network Services Price Cap Tariff for assigning of numbers are also applicable.
- j. Upon the termination of an SLS number the call number will not be reassigned for a period of one year unless that number is requested by a sponsor who intends to offer the same or similar program topic and content. In any circumstance, the call number assignment is at the sole discretion of the Company and may be reassigned upon request.
- k. Transfer of calls will be handled on an individual case basis when an SLS sponsor either disconnects his service or his SLS number is changed.
- l. Sponsorship of any particular announcement or recorded program service shall not preclude another sponsor from sponsoring the same or similar announcement.
- m. The Company reserves the right to provide to the general public, upon specific request, the complete address and telephone number of the sponsor in response to inquiries and comments referring to sponsor services. The Company will identify the current sponsor selected price in effect for any program upon receipt of any request for that information.

B.1. (Cont'd)

- n. One directory listing is furnished without charge in the alphabetical section of the serving exchange's directory. Rates, terms and conditions as specified in 5.7.1, Directory Listings, preceding, also will apply. No directory listings are available with Reserved Number Service.
- o. The following services, specified in applicable Tariffs, are not available with SLS Service:
 - Temporary Suspension of Service
 - Direct Inward Dial Service
 - Installment Billing Service
 - Custom Calling Service
 - Combination Access Line Service
- p. A one month minimum billing period is required for SLS.
- q. Provision of this service is subject to all applicable Tariffs of the Company.

2. Billing and Remittance

- a. On behalf of the SLS sponsor, the Company will bill clients for each call completed to the SLS announcement or program.

Due to technical or nontechnical conditions, the Company may be able to bill for certain other types of calls that complete to the SLS announcement or program. The Company reserves the right to determine which types or classes of calls will be billed.

Each SLS per call charge will be itemized on the client's toll statement.

- b. No other charge for SLS calls will be made by the sponsor.

B.2. (Cont'd)

- c. The Company will issue a remittance check monthly to the SLS sponsor based upon the total number of directly billed client calls, as described in 2.a., preceding.

The remittance check will equal the SLS sponsor's established rate per call multiplied by the number of qualifying calls, LESS (i) the total of the Call Delivery Charges (the charges to the sponsor for the transport and billing of each call) for all such qualifying calls; (ii) any overflow call charges as described in B.1.d., preceding; and (iii) any reserved or deduction for uncollected and/or adjusted amounts.

The number of calls on which the remittance is based will be included with the SLS Sponsor's remittance check. Charges for providing this remittance check, identified as Sponsor Remittance Service in A., preceding, are specified in E., following.

A separate document itemizing any nonrecurring or recurring charges owed to the Company by the sponsor will be issued.

- d. The Company report of the number of billed calls to each SLS program will serve as the sole source of information upon which remittance will be made. The Company will not be liable for incorrect counts of completed calls resulting from lost or damaged tapes or program failures.

If the accuracy of the remittance is not disputed in writing within 30 days of the remittance, it will be deemed as correct.

- e. Any type of call which completes to the sponsor's announcement or program equipment, but which can not be billed by the Company, will not be included in the remittance process.

109.5 PUBLIC ANNOUNCEMENT SERVICES

109.5.3 SCOOPLINE SERVICE (SLS) (Cont'd)

C. Sponsor Obligations

1. The sponsor shall provide, via SLS, continuous, uninterrupted automatic pre-recorded announcement or interactive program services. The sponsor-provided equipment will allow access to an announcement message by a calling party within a maximum of 30 seconds. This equipment will provide each call an off-hook condition (answer supervision) at the beginning of each call and an on-hook condition (disconnect supervision) upon the completion of a full announcement cycle time duration.
2. For network sizing and protection, each sponsor must provide at the time they apply for service, a written estimate of monthly call volumes, the expected busy hour and busy hour call volumes, and holding time for each announcement or interactive program.
3. The sponsor assumes all financial responsibility for all costs involved in providing announcement or recorded program services including, but not limited to, the recorder-announcement equipment, producing the recordings, advertising and promotional expenses.
4. The sponsor is required to inform potential clients, in a reasonably conspicuous manner, that a call to his SLS announcement or recorded program telephone number will carry a charge, established by the sponsor and the amount thereof, and that such charges will be billed by the Company.
5. Any request by the sponsor for a change in the amount the Company is to bill per call, must be received by the Company in writing, at least 60 days prior to the proposed effective date. The sponsor will also be required to place a message on the recorded announcement or interactive program informing the caller of the new price per call 15 days prior to the rate change and 15 days after the rate change.
6. The sponsor has exclusive responsibility and control over the content, quality and characteristics of speech used in the recording. The Company assumes no liability for the quality of, defects in, or contents of the recording. The sponsor shall exclude from the message or announcement any matter, the dissemination of which is prohibited by law, on the agreement between the sponsor and the Company.

109.5.3 SCOOPLINE SERVICE (SLS)

C. Sponsor Obligations (Cont'd)

7. The sponsor understands and agrees that all announcements must comply with all Federal, State and Local laws, rules and regulations.

In the event that the contents of the sponsor's message or announcement are found to be unlawful by an appropriate law enforcement or regulatory agency, the Company reserves the right to refuse service or to terminate service upon receipt of an order from that agency so directing.

8. Sponsor identification is required in all advertising or at some point in the recording.
9. The sponsor is responsible for obtaining all necessary permission, licenses, written consents, waivers and releases and all other rights from all persons whose work, statements or performance are used in connection with the service, and from all holders of copyrights, trademarks and patents used in connection with said service.
10. The sponsor shall be liable for, and shall indemnify, protect, defend and save harmless the Company against all suits, actions, claims, demands and judgements, of all costs, expenses and counsel fees incurred on account thereof, arising out of and resulting directly or indirectly from the service or in connection therewith, including but not limited to, any loss, damage, expense or liability resulting from any infringement or claim of infringement, of any patents, trademark, copyright, or resulting from any claim or libel and slander, or any other claims related to the content of the program material.

110.8 NETWORK CONNECTING ARRANGEMENTS[1]

A. Description

Customer equipment and facilities may be connected to facilities of the Company, subject to the terms, conditions, rates and charges specified herein.

B. Terms and Conditions

1. In accordance with the provisions of Part 68 of the FCC Rules, installation of new connecting arrangements to facilities of the Company will not be made:
 - After July 1, 1979, for connection of customer-provided terminal equipment.
 - After January 1, 1980, for connection of customer-provided multiline terminating systems, and
2. Connecting arrangements of a type associated with customer terminal equipment or multiline terminating systems connected to facilities of the Company prior to the dates set forth in 1., preceding, will be provided subject to their availability, to reconnect such equipment.
3. Certain items provided in this 110.8 may require the use of commercial power. The rates quoted contemplate the use of standard equipment designed to operate on 110 volts, 60 cycles a.c. power. When special equipment, designed to operate on other voltages or frequencies, is required, the Company may make a reasonable additional charge. The commercial power, power wiring and outlets necessary for the operation of the equipment will be furnished by the customer.
4. The operation, maintenance and operating characteristics of the customer equipment and the magnitude and character of the voltages and currents delivered to the Company connecting equipment shall be such as not to interfere with any of the equipment offered by the Company or interfere with others. Such customer equipment shall operate in such a manner as to avoid hazard or damage to Company plant or of injury to Company employees or customers because of the character or location of the customer apparatus and of sources of power to which it is connected. Upon notice from the Company that the equipment of the customer is causing or is likely to cause hazard or interference, the customer shall make such changes as may be necessary to remove or prevent such hazard or interference.

5. Obligation of the Customer

The customer indemnifies and saves the Company harmless against libel, slander or the infringement of copyright or patents arising from the improper use of material transmitted over its facilities or from combining with, or using in connection with, facilities of the Company, apparatus and systems of the customer; and against all other claims arising out of any act or omission of the customer in connection with facilities provided by the Company.

6. Responsibility of the Company

The Company shall not be responsible to the customer for damages arising out of mistakes, omissions, interruptions, delays or errors or defects in transmission, except those caused by its failure to furnish facilities suitable for ordinary telephone service or its failure to maintain and operate such facilities in a manner proper for telephone service. The liability of the Company for damages, caused by its failure to furnish facilities suitable for ordinary telephone service or its failure to maintain and operate such facilities in a manner proper for telephone service is as set forth in Section 2 of the Exchange and Network Services Price Cap Tariff.

7. The rates and charges for connecting arrangements are added to those for any associated services or facilities.
8. The charge to move a connecting arrangement includes connection to the associated service or facility.
9. The nonrecurring charges found in this 110.8 only apply to moves.

D. Recording, Reproducing, and Automatic Answering and Recording Equipment

1. Description

- a. Customer recording, reproducing and automatic answering and recording equipment may be used in connection with the facilities of the Company for the following purposes and subject to the terms, conditions, rates and charges specified herein.
- b. Telecommunications service is not represented as adapted to the recording of telephone conversations or incoming messages, or to the transmission of prerecorded messages.

2. Terms and Conditions

- a. Use of Company facilities for public announcements are subject to the following conditions:
 - (1) For the purposes of identification, customers who transmit recorded public announcements over facilities provided by the Company must include in the recorded message the name of the organization or individual responsible for the service and the address at which the service is provided.
 - (2) Customers transmitting factual public announcements such as time, weather, stock market quotations, air line schedules and similar information are excluded from the preceding condition.
 - (3) Failure to comply with the provisions herein shall be cause for termination of the service.

I. Telephotograph Equipment

1. Description

Telephotograph equipment provided by the Press may be connected to lines of the Company for use by the Press for the transmission and reception of pictures and similar material for publication. Telephotograph equipment provided by law enforcement agencies may be connected to lines of the Company for use by law enforcement agencies for the transmission and reception of fingerprints, ballistic data, identification photographs and similar law enforcement material. Telephotograph equipment provided by the Armed Forces of the United States may be connected to lines of the Company for use by the Armed Forces of the United States for transmission and reception of information of military necessity essential to the national defense. Telephotograph equipment provided by civilian defense agencies may be connected to lines of the Company for use by civilian defense agencies for the transmission and reception of information essential for the discharge of their responsibilities in emergencies.

2. Terms and Conditions

- a. Customer telephotograph equipment may be connected either by direct physical connection or by acoustic or inductive coupling. Direct physical connection may be made only by means of protective connection equipment furnished by the Company. The connection of the telephotograph equipment may be made by the customer only to the terminals of the protective connection equipment.
- b. Portable protective equipment will be furnished, if desired, for use with portable telephotograph equipment of the customer.
- c. The telephotograph equipment may be used in connection with any class of business service, except PAL Service, or to dedicated private line service furnished to the customers specified in 1., above, or made available to them under a joint user agreement.
- d. The Company may interrupt the connection if at any time such action should become necessary in order to protect any of its services because of departure from the above requirements.
- e. The Company assumes no responsibility for the quality of, or defects in, the material transmitted or received regardless of cause.

DECISION #: 68604

Issued: 4-24-06

ORIGINAL

Effective: 5-1-06
Per Decision No. 68604

115. OBSOLETE MISCELLANEOUS SWITCHED DIGITAL SERVICE OFFERINGS

115.2 SWITCHNET 56 SERVICE

A. Description

Effective October 17, 2003, *SWITCHNET 56* Service is grandfathered. Existing customers using the service on a monthly basis may continue with the service for up to six months after a substitute service is available at which time *SWITCHNET 56* will be discontinued. The Company will continue to honor all *SWITCHNET 56* contractual agreements for the length of the existing contract. Additions, changes or moves of existing contracted customers will continue to be made where the required equipment and facilities are available.

1. *SWITCHNET 56* Service is a single-party, four-wire, conditioned service which is capable of switching and transmitting 56 kilobits per second of digital data. This service will allow for the transmission of 56 kilobit data, both intraLATA and interLATA. This document addresses intraLATA. In addition, the *SWITCHNET 56* Service may be used in conjunction with Feature Group D to complete interLATA/interstate calling.

B. Terms and Conditions

1. *SWITCHNET 56* Service is furnished only in central office areas where adequate facilities are available. Central Offices will be equipped for this service based on customer demand and at the discretion of the Company.
2. Operator handled calls cannot be completed on this service. Access to 911 and 411 is not available.
3. Usage for *SWITCHNET 56* Service is a bulk local summary statement on the customer's bill.
4. This service is available to customers who are served from a central office that is compatible with the *SWITCHNET 56* central office equipment. *DIGICOM II* mileage rates and charges as specified in 6.1.2 of the Competitive Private Line Transport Services Price Cap Tariff will apply to customers who are served out of a serving central office that is not compatible for *SWITCHNET 56*.
5. Incremental charges as specified in 5.1.6 of the Exchange and Network Services Price Cap Tariff also apply to this service.
6. *SWITCHNET 56* Service is a measured data access line service. The restriction against combining flat and measured service at the same location does not apply to *SWITCHNET 56* Service.
7. *SWITCHNET 56* may be ordered on a month-to-month basis or under a fixed service agreement for periods between one to seven years.

ORIGINAL

Effective: 5-1-06
Per Decision No. 68604

115. OBSOLETE MISCELLANEOUS SWITCHED DIGITAL SERVICE OFFERINGS

115.2 SWITCHNET 56 SERVICE (Cont'd)

C. Payment Arrangements

1. Month-to-Month

Service provided under the non-stabilized month-to-month plan may be upgraded to fixed period plans at any time without the customer incurring nonrecurring or discontinuance charges.

2. Fixed Period

Fixed period service agreements allow the customer to order service with the assurance that during the period of the service agreement monthly rates for the *SWITCHNET 56* line and usage will not exceed the levels in effect at the time the service is ordered, except as may be ordered by the Arizona Corporation Commission.

The customer must specify the length of the fixed period at the time the service is ordered.

At the end of the fixed service period, the customer may negotiate a new fixed period service agreement, convert to month-to-month service or may terminate service. The monthly rates will be those rates in effect at the time the new service period begins. Should the customer not make a choice by the end of a fixed period service agreement, service rates will automatically revert to those in effect for the month-to-month option. If service is continued under any of the pricing plans, including non-stabilized month-to-month, nonrecurring charges will not apply.

If a rate decrease occurs during a customer's fixed period, the reduced rates will automatically be applied to the remaining term of the service agreement in effect at that time.

After the service date, if a rate stabilized customer reduces their data circuits, in whole or in part, to a level that is less than 60% of the initial service, a termination charge may apply as set forth in 2.2.4.D. of the Exchange and Network Services Price Cap Tariff.

Fixed period service agreements are subject to the terms of the Termination Liability/Waiver Policy as set forth in the Exchange and Network Services Price Cap Tariff, 2.2.14.D. of the Exchange and Network Services Price Cap Tariff.

• Teletypewriter, each - Type 5105	7HP	\$67.23	\$22.41	(C)

c. Moves

- (1) When a service terminal is moved to a different building, nonrecurring charges apply.
- (2) When a service terminal is moved to a new location within the same building, one-half the nonrecurring charge applies.

3. Connecting Arrangements

a. A connecting arrangement is required for each connection of a channel to:

- (1) An intraLATA interexchange channel furnished under other series, except where the connection is by means of a switching arrangement; and
- (2) An alternate use arrangement, as specified in 5., following, except where a connecting arrangement, for the purpose specified in (1), preceding, or a service terminal is provided.

105.2.10 DATAPHONE DIGITAL SERVICE

A. Miscellaneous Arrangements

1. A move charge equal to one half the nonrecurring charge applies when an item is moved on the same premises except that move charges do not apply for items that are fastened to or are made an integral part of the equipment or arrangement with which they are associated and with which they are moved.

2. Rates and Charges

Basic arrangement with 56 kbit/s Multiplexor for use with a *DATAPHONE* Digital Service operating at 56 kbit/s to create up to 21 synchronous data bit streams and provide data service in various combinations of sub-multiples of 56 kbit/s. Requires the use of two 56 kbit/s Multiplexors.

	USOC	NONRECURRING CHARGE	
		MAXIMUM	CURRENT
• Basic arrangement with capacity to create up to 11 data bit streams, each ^[1]	Q5A	\$ 1,662.00	\$ 831.00
- Termination Charge	Q5A	10,600.00	5,300.00
• Incremental arrangement with capacity to create additional data bit streams up to the maximum of 21, each	Q5B	702.00	351.00
• Per data bit stream created	Q5D	84.00	42.00
• Rearrangement to change operating speed or to create additional data bit streams	N/A	220.00	110.00

[1] The initial contract period is 5 years at the same location. The termination charge reduces 1/60 for each month the recurring rate is paid.

105. OBSOLETE SERVICES

105.2 SERVICE DESCRIPTIONS (Cont'd)

105.2.13 DS1 SERVICE

(T)

A. Clear Channel Capability

An arrangement that allows a customer to transport any framed sequence of binary ones and zeroes through a 1.544 Mbit/s channel.

1. Basic Option

This option requires the customer signal at the channel interface to conform to either the bipolar AMI line code with Zero Byte Time Slot Interchange (ZBTSI) algorithm or the Bipolar with eight Zero Substitution (B8ZS) as described in Technical Reference TR-INS-000342. If the channel interface conforms to the B8ZS line code algorithm, it may be transcoded to ZBTSI for transmission through the network. If the customer signal at the channel interface is transcoded from B8ZS to ZBTSI for transmission through the network, performance messages on the data link which do not conform to standards described in TR-NPL-000054 may not be transported.

2. Rates and Charges

(T)

B. DC Line Power[1]

1. Description

DC Line Power provides a D.C. connection between the simplexes of the transmit and receive pairs, and provides 60mA from a constant current source. The connection will be at the customer end user's network interface, and in association with the DU network channel interface code. DC Line Power is available only when technically feasible.

2. Rates and Charges

	USOC	MAXIMUM MONTHLY RATE	CURRENT MONTHLY RATE	(C)

5. EXCHANGE SERVICES

5.2 LOCAL EXCHANGE SERVICE (Cont'd)

5.2.2 LOW USE OPTION SERVICE

A. Description

1. Residential service for which message unit charges are based on the number of local calls placed. The Low Use Option includes an individual exchange access line with touch-tone capabilities. Services other than those associated with this offering will not be allowed.
2. Calls to directory assistance, 911, ScoopLine (SLS) and telephone repair service are not subject to message unit charges.

B. Rates and Charges

1. Low Use Option Service

	USOC	NONRECURRING CHARGE	MONTHLY RATE
• Residence			
- Individual line[1]	RMN	\$27.50 (R)	\$8.50

(D)
(D)

2. The following message unit charge applies for calls placed within exchanges in the same local calling area.

CHARGE FOR EACH
MESSAGE

• Residence	\$0.20
-------------	--------

[1] See the Competitive Exchange and Network Services Price Cap Tariff No. 2 for Low Use Option Service additional lines, in 5.2.2 of that tariff.

5. EXCHANGE SERVICES

5.2 LOCAL EXCHANGE SERVICE (Cont'd)

5.2.4 FLAT RATE SERVICE

This service entitles customers to an unlimited number of calls within the local calling area. Incremental charges, as shown in 5.1.6.A., apply to service outside the exchange base rate area.

A. Rates and Charges

1. The nonrecurring charge associated with the provision of flat rate service applies:
 - To install each access line;
 - For connecting an access line when changing a grade of service from PBX service.
2. Residence Flat Rate Service

	USOC	NONRECURRING CHARGE	MONTHLY RATE

D. Nonpublished Service[1]

1. Description

- a. The telephone numbers of Nonpublished Service are not listed under the current subscriber's name in the telephone directory or in the information records available to the general public.
- b. Nonpublished information may be released to emergency service providers, to customers who subscribe to Company offerings which require the information to provide service and/or bill their clients, or, to telephone customers who are billed for calls placed to or from nonpublished numbers and to entities which collect for the billed services. Nonpublished names and/or telephone numbers may also be delivered to customers on a call-by-call basis.

2. Terms and Conditions

- a. Incoming calls to Nonpublished Service will be completed only when the calling party places the call by telephone number. The Company will adhere to this condition notwithstanding any claim made by the calling party.
- b. No liability for damages arising from publishing the telephone number of Nonpublished Service in the telephone directory or disclosing the telephone number to any person shall attach to the Company. Where such number is published in the telephone directory, the Company's liability shall be limited to a refund of any monthly charges assessed by the Company for the Nonpublished Service.
- c. The customer indemnifies and saves the Company harmless against any and all claims for damages caused or claimed to have been caused, directly or indirectly, by refusing to disclose a nonpublished telephone number upon request or by the publication of the number of a Nonpublished Service in the telephone directory or disclosing of such number to any person.

5. EXCHANGE SERVICES

5.7 DIRECTORY SERVICES

5.7.1 LISTING SERVICES

D.2. (Cont'd)

- d. The monthly rate for Nonpublished Service does not apply to:
- PAL Telephone Service.
 - FX Service where the customer is also furnished regularly listed exchange service from the normal exchange.
 - Service in addition to the regularly listed service for the same customer at the same location, e.g., additional lines in a rotary group.
- e. Due to the limited supply of vacant telephone numbers, there may be situations where a number appears in the current directory under a prior subscriber's name.
- f. The Company may disclose a nonpublished number to its authorized collection agents in order to collect amounts owed to the Company.

E. Nonlisted Service[1]

1. Description

At the request of the customer, any one or all of the customer's Primary Listings, Additional Listings or other listings associated with the same or different CO line or trunk normally published in the alphabetical directory will be omitted from the directory but listed in the information records available to the general public.

2. Terms and Conditions

The customer indemnifies and saves the Company harmless against any and all claims for damages caused or claimed to have been caused directly or indirectly by the publication of a listing which the customer has requested be omitted from the telephone directory or the disclosing of such a listing to any person. Where such a listing is published in the telephone directory, the Company's liability shall be limited to a refund of any monthly charges assessed by the Company for the particular Nonlisted Service.
